CRIME AND JUSTICE IN NEW YORK STATE

1981 ANNUAL REPORT

This is the seventh annual report of crime in New York State prepared pursuant to the responsibility assigned to the Division of Criminal Justice Services (DCJS) by Chapter 654 of the laws of 1974. In addition to reflecting the offense and arrest data reported by the law enforcement agencies of New York State through the Uniform Crime Reporting program, the report also provides a broad overview of the roles played by the entire criminal justice community in responding to the problem of crime in this state.

The continued support and cooperation of nearly 600 police departments, sheriffs' offices and specialized police agencies participating in all aspects of the Uniform Crime Reporting program, has proven invaluable in assisting DCJS in carrying out its responsibilities.

The Felony Processing System has continued to provide valuable information concerning indictments, dispositions and sentences. These data are reported to DCJS by the District Attorneys and Special Prosecutors of this State to whom we express our appreciation for their continued cooperation and assistance.

In order to provide a broad and comprehensive view of the criminal justice process, data from the courts, probation, corrections, parole and the Crime Victims Compensation Board has been once again included in the report. We are indebted to the State Administrator of the Courts, the Director of Probation, the Commissioner of Correctional Services, the Chairman of the Commission of Correction, the Director of the Division for Youth, the Chairman of the Board of Parole and the Chairman of the Crime Victims Compensation Board. With the inclusion of data from these agencies, the Crime and Justice Annual Report is truly representative of the entire criminal justice community.

We trust that the data contained in this report will prove useful to the criminal justice administrators, to the executive and legislative branches of government, to researchers, planners and the general public. We are confident that the contributions and counsel of those who have participated in the preparation of this report will continue to assist us in providing the people of the State of New York with a keener insight into the problem of crime in New York State.

FOREWORD

The crime index in New York State increased a scant 0.7 percent during 1981, perhaps signaling that the index is nearing a peak. Despite this hopeful sign however, we cannot become complacent. We must renew our intensity in the fight against crime to insure that the future will continue to show improvement.

How can crime be reduced? How can individuals be assured of their personal safety and the security of their property? The answer lies in the actions of the government, in the effectiveness of the criminal justice system and, most of all, in the attitudes and cooperation of the people themselves.

Swift and certain punishment has been and continues to be accepted as a major deterrent to criminal activity. The criminal justice system has responded to the challenge of the rising crime rate with large increases in felony arrests, felony indictments, convictions and state prison sentences. Major emphasis has been placed on the apprehension and conviction of violent offenders and career criminals. Plea bargaining has been restricted in cases of armed felonies and more severe sentences are being imposed on violent offenders and second felony offenders.

Public concern about crime has been evidenced in neighborhood watches, participation in Operation Identification and other crime prevention programs. Cooperation between an involved public and an active and responsive criminal justice community is critical if we are to be effective in the continuing struggle against crime.

INTRODUCTION

The New York State Division of Criminal Justice Services was assigned the responsibility for the collection of data concerning crimes and arrests in New York State, effective January 1975, pursuant to Chapter 654 of the laws of 1974. In assuming that responsibility, the Division was also committed to providing relevant data to the National Uniform Crime Reporting program administered by the Federal Bureau of Investigation. This publication is the seventh annual report produced in discharge of that responsibility.

Uniform Crime reports submitted monthly by police agencies in New York State are the basis for much of the material contained in this report. These reports include information on Part I offenses, Part II offenses, location and time of the offense, value of property stolen, Part I arrests, Part II arrests, law officers killed or assaulted and number of law enforcement employees. In 1981, all 586 law enforcement agencies participated in the Uniform Crime Reporting program and agencies with multi-county jurisdictions reported separately for each county within their jurisdictions. Because of reporting problems by the Suffolk County Police Department, offense and arrest data have been estimated for this agency for the months of September through December 1981.

Police agencies also submit supplementary reports on homicide and arson offenses. These detailed reports allow for a more trenchant analysis of these serious crimes.

In addition to the Uniform Crime Reporting data contained in this report, we have provided data on felony arrests, felony drug arrests and felony indictments and dispositions. The arrest material is derived from the Computerized Criminal History (CCH), which is based on the arrest fingerprint cards submitted to the Division of Criminal Justice Services in compliance with section 160.20 of the Criminal Procedure Law. Felony arrests and felony drug arrests are presented for each county from 1977 through 1981. The felony indictment and disposition material is reported by District Attorneys and Special Prosecutors throughout the State and is authorized by Section 837a of the Executive Law. This material includes data on felony indictments, felony drug indictments, felony dispositions, felony drug dispositions and median time from indictment through disposition.

Information from other criminal justice agencies is included in this report, in order to present in one volume as much information as possible about the criminal justice system. Agencies that have submitted data and are included in this report are: The Office of Court Administration, the Division of Probation, the Department of Correctional Services, the Commission of Correction, the Division of Parole, the Division for Youth and the Crime Victims Compensation Board.

Also included in this report is an analysis of adult felony arrests disposed in 1979. Data for the study were obtained from the Computerized Criminal History Offender-Based Transaction Statistics maintained by the Division of Criminal Justice Services. Disposition data from this study includes both the lower and upper courts. The term "lower court" refers to a district, city, town, the New

York City Criminal Court, a supreme court justice sitting as a local criminal court or a county judge sitting as a local criminal court. The term "upper court refers to the supreme court or a county court. This court has exclusive trial jurisdiction over felonies.

For many reasons not all offenses come to the attention of the police. Victims may feel too embarrassed to report a crime or that the loss sustained was too small to report or feel that there is nothing the police can do. Victimization studies have confirmed that many offenses are underreported. When an offense is cleared, it is usually done by one or more arrests. However, there are exceptional circumstances when an offense may be cleared without an arrest. Exceptional clearances result when the police know who the offender is, where he is, and have enough evidence to support an arrest but are prevented from doing so because of some reason outside their control.

In May 1979, the Governor's Task Force on Domestic Violence was established by Executive Order to study the "traumatic effects of domestic violence and how our social and legal systems can better deal with such violence and its causes". The Division of Criminal Justice Services collects data on selected domestic violence crimes: Aggravated Assault, Simple Asssault, Sex Offenses, Other Offenses (e.g. Reckless Endangerment, Menacing, etc.) and Violations of Protective Orders. This is the second Annual Report on Crime and Justice in which data on domestic violence have been reported. Through improved reporting procedures and the cooperation of law enforcement agencies across the State, the increased volume represents a much more complete picture of domestic violence in New York State than the data in the 1980 report.

The UCR data included in this report are divided into five main segments:

A. Reports of Part I offenses comprising the following crime classifications:

1. Criminal Homicide

   a. Murder and Non-Negligent Manslaughter
   *b. Negligent Manslaughter

2. Forcible Rape

3. Robbery

4. Aggravated Assault

5. Burglary

6. Larceny

7. Motor Vehicle Thefts

*All of the above, with the exception of 1(b) Negligent Manslaughter, comprise the Crime Index, which is used to measure the relative extent of crime nationwide and to show trends in crime.

We have also attempted to provide greater detail about reported index crime including:

a. Type of weapon/force used

b. Type of location in which the crime was committed

c. Number of offenses cleared

d. Type and amount of property stolen and recovered.

B. Part II Offenses

8. Arson
   commercial, residential
   or motor vehicle
9. Kidnapping
10. Controlled Substances
    Sale/Manufacture-Opium, Cocaine, Derivatives, Marijuana, Synthetic Narcotics, Other Dangerous Drugs
11. Dangerous Weapons
    Handguns, Other Firearms, Explosives, Other Weapons
12. Bribery
13. Sex Offenses
14. Extortion
15. Forgery & Counterfeiting
16. Prostitution & Vice
    Promoting Prostitution, Prostitution and Patronizing Prostitutes
17. Stolen Property
18. Coercion
19. Criminal Mischief
20. Fraud
21. Gambling
    Bookmaking, Numbers & Lottery, All Other Gambling
22. Offenses Against Public Order
23. Embezzlement
24. Simple Assault
25. Offenses Against Family
26. Driving Under Influence
    Alcohol, Drugs
27. Unauthorized Use of Vehicle
28. Possession of Burglar Tools
29. Liquor Law Violations
30. Disorderly Conduct
31. Public Drug Intoxication
32. Loitering
33. All Other Offenses

C. Age, Sex and Race of Persons Arrested

1. Persons Under 16 Years of Age (Juvenile)
2. Persons 16 Years of Age and Over (Adults)

The arrest reports reflect the number of persons arrested for Part II offenses, as described above.

NOTE: The FBI/UCR program treats persons under 18 as juveniles, and requires that they be so reported. This report, however, is compiled in accordance with New York State law which classifies juveniles as those persons under 16 and adults as those 16 and over.

D. Law Enforcement Officers Killed or Assaulted

Statistics are provided on the number of New York State law enforcement officers killed or assaulted and description in some detail, of the conditions under which the officers were assaulted.

E. Homicide Analysis

This portion of the report provides details on homicides committed in New York State, describing the victims and circumstances under which such homicides occurred.

In order to combat crime effectively, it must be known when and where crime is occurring. The county, as a crime location index, is not sufficiently definitive. Therfore, we have instituted direct reporting to the state program from every police chief and sheriff in New York State in accordance with state law.

It is important to note that without the collaboration of the law enforcement agencies and cooperation of other criminal justice agencies , this report would not be possible.

POPULATION DATA SOURCE

Population data used for calculating crime rates for the 1981 Crime and Justice Report are final 1980 census data. These were obtained from the U.S. Department of Commerce's Bureau of Census Population and Housing Unit Counts (document No. PHC80-V-34).

It should be noted that a major change in crime rate from a previous year could result from an increase or decrease in the number of actual offenses reported by police, a significant shift in population or a combination of both.

STATUTORY AUTHORITY

The collection, analysis and dissemination of criminal justice data in New York State is authorized by Sections 837, 837-a and 837-b of the Executive Law, to wit:

"§ 837. Functions, powers and duties of division

The division shall have the following functions, powers and duties:

... 4. In cooperation with the state administrator of the unified court system as well as any other public or private agency,

... (c) collect and analyze statistical and other information and data with respect to the number of crimes reported or known to peace officers, the number of persons arrested for the commission of offense, the offense for which the persons was arrested, the county within which the arrest was made and the accusatory instrument filed, the disposition of the accusatory instrument including, but not limited to, as the case may be, dismissal, acquittal, the offense to which the defendant pled guilty, the offense the defendant was convicted of after trial, and the sentence."

"§ 837-a. Additional functions, powers and duties of the division

In addition to the functions, powers and duties otherwise provided by this article, the division shall:

1. Collect and analyze statistical and other information and data with respect to the number of persons charged with the commission of a felony by indictment or the filing of a superior court information, the felony with which the persons was charged therein, the county within which the indictment or superior court information was filed, the disposition thereof including, but not limited to, as the case may be, dismissal, acquittal, the offense to which the defendant pleaded guilty, the offense the defendant was convicted of after trial, and the sentence."

"§ 837-b. Duties of courts and peace officers

1. It is hereby made the duty of the state administrator of the unified court system; and of every sheriff, county or city commissioner of correction and head of every police department, state, county or local, and also railroad, steamship, park, aqueduct and tunnel police and town constables, of every district attorney, of every probation agency; and of head of every institution or department, state, county, and local, dealing with criminals and of every other officer, person or agency, dealing with crimes or criminals or with delinquency or delinquents, to transmit to the commissioner not later than the fifteenth day of each calendar month, or at such times as provided in the rules and regulations adopted by the commissioner, such information as may be necessary to enable him to comply with subdivision four of section eight hundred thirty-seven. Such reports shall be made upon forms which shall be supplied by the commissioner.

2. Such officers and agencies shall install and maintain records needed for reporting data required by the commissioner and shall give him or his accredited agents access to records for the purpose of inspection.

3. For every neglect to comply with the requirements of this section, the commissioner may apply to the supreme court for an order directed to such persons responsible requiring compliance. Upon such application the court may issue such order as may be just, and a failure to comply with the order of the court shall be a contempt of court and punishable as such."

NEW YORK STATE COUNTIES AND COUNTY SEATS★

Published by

STATE OF NEW YORK

DEPARTMENT OF COMMERCE

THE

PROBLEM

OFFENSES

The problem of crime is manifest in the volume of offenses and the violent nature of many crimes. Index offenses, which include murder, forcible rape, robbery, aggravated assault, burglary, larceny and motor vehicle theft, totaled 1,213,148 in New York State in 1981. This figure represents a slight increase of 0.7% over the 1980 figure of 1,204,417. The violent offenses, murder, forcible rape, robbery and aggravated assault, numbered 188,039 reflecting a 4.5% increase from 1980. These crimes, in which there is usually a confrontation between the victim and the offender, are largely concentrated in urban areas with dense populations. For example, New York county, with 8% of the State population and a density of 64,000 persons per square mile, reported 30% of the robberies in New York State.

Comparisons of crime rates between police agencies or counties should be made only with extreme caution. The crime rates published in this report are based solely on offenses reported or known to the police and the resident population. Additional factors which may influence crime rates are density of population, age of population, geographic location, topography, social attitudes, economic conditions, number of police officers, seasonal and transient population and rural or urban environments.

VIOLENT OFFENSES

Violent offenses accounted for 15.5% of the Index total and 83.5% of the violent offenses occurred in New York City. Both New York City and Upstate showed increases in violent offenses from 1980 to 1981. Nearly 28.5% of the violent offenses involved the use of handguns. Streets and highways were the location of about half the violent offenses and residences were the scene in approximately one-fifth of the offenses. Violent offenses were usually committed against lone victims, with homicides and assaults tending to be committed by a single offender and robberies usually involving multiple offenders. Violent offenses were cleared at a 29.9% rate.

NON-VIOLENT OFFENSES

The non-violent Index offenses are burglary, larceny and motor vehicle theft and they constituted 84.5% of the Index total in 1981. Statewide, these offenses totaled 1,025,109, up only 0.1% from 1980. New York City accounted for 55.6% of the non-violent offenses and showed a 1.6% increase from 1980 to 1981, while Upstate registered a 1.8% decrease. Larceny is the largest category among non-violent offenses, accounting for 52.5% of the total. Non-violent offenses were cleared at a 13.1% rate.

MURDER AND NON-NEGLIGENT MANSLAUGHTER

Murder dropped from 2,225 in 1980 to 2,171 in 1981, down 2.4%. Murder offenses made up only 0.2% of the Index offense total. The 1,826 murder offenses reported from New York City accounted for 84.1% of the State total. New York City showed a 0.7% increase in murder offenses while Upstate showed a 13.7% decrease. The clearance rate for murder offenses was 61.5%.

FORCIBLE RAPE

Statewide, forcible rape offenses showed a 1.5% increase, New York City was up 4.1% while Upstate dropped 4.2%. Rape offenses made up 0.5% of the Index total and 2.9% of the violent offense total. Some type of weapon was used in 52.5% of the offenses and in 11.7% of the offenses the weapon was a handgun. For those offenses involving a handgun, 91.8% were committed in New York City. In the Upstate area, 61.2% of the offenses involved no weapon. Statewide, the clearance rate for rape offenses was 40.7%.

ROBBERY

Statewide, robbery offenses increased from 112,144 in 1980 to 120,352 in 1981, up 7.3%. Robbery offenses constitute 64.0% of the violent offense total and largely account for the overall increase in the violent offense category. The 8,208 increase in robbery offenses was the largest increase of any Index offense and was nearly as much as the overall increase in Index offenses. Upstate registered a 10.4% increase in robbery offenses compared to a 7.0% rise in New York City. However, New York City continued to account for almost 90% of the robberies offenses reported in New York State. More than half of the robberies occurred on streets and highway, with residences the next most prevalent location.

Handguns were used in 34.4% of the robbery offenses in New York State and were usually employed in robberies of gas stations, convenient stores, banks and other buildings.

The clearance rate for robberies increased from 15.9% in 1980 to 18.5% in 1981.

AGGRAVATED ASSAULT

A total of 60,040 aggravated assaults were reported statewide in 1981, a 0.3% decrease from 1980 and the second consecutive year in which aggravated assaults reflected a decrease. New York City reported a slight gain in aggravated assault offenses, while Upstate showed a 3.1% decrease. New York City reported 73.0% of the aggravated assault offenses and in New York City 22.6% of the aggravated assaults involved the use of handguns compared to 2.9% Upstate.

Statewide, the street was the location in 44.5% of the aggravated assault offenses, with an additional 28.7% occurring in residences.

Slightly more than half of the aggravated assault offenses were cleared.

BURGLARY

A total of 349,865 burglary offenses were reported in New York State in 1981, a 3.5% decrease from 1980. New York City reported a 2.2% decrease in burglary offenses and Upstate a 3.0% drop.

Residences accounted for 70.4% of the burglaries and non-residences 29.6%. Where the time of the offense could be established, 68.3% of the burglaries of residences took place during the day and 56.3% of the non-residence burglaries at night. No force was required to gain entrance to 18.2% of the residences and 11.8% of the non-residences. Burglary is the second largest Index offense category, accounting for 28.8% of the Index total.

The clearance rate for burglaries was 12.2%.

LARCENY

Statewide, larceny offenses showed a 1.1% increase, with New York City up 3.8% and Upstate down 1.3%. Larceny is the only Index offense that occurs more frequently Upstate than in New York City. Two-thirds of the larcenies involve thefts with a value of fifty dollars or more. Pocket picking and purse snatching, offenses that involve contact between victim and offender, made up 9.4% of the larceny total.

Larceny is the largest Index category and accounted for 44.4% of the Index total. The clearance rate for larcenies was 15.2%.

MOTOR VEHICLE THEFT

Motor vehicle thefts showed a 2.9% increase from 1980 to 1981 in New York State and the 136,716 offenses were the largest number ever reported. New York City reported a 4.2% increase in motor vehicle thefts, while Upstate decreased 1.0%. Vehicles parked on streets appeared to be especially vulnerable, and were responsible for 63.4% of the motor vehicle thefts.

Motor vehicle thefts made up 11.3% of the Index total. The clearance rate for motor vehicle thefts was 7.1%. These offenses are cleared only by an arrest or exceptional clearance and not by recovery of the vehicle alone.

PART II OFFENSES

Part II offenses totaled 1,200,978 in 1981, up 2.0% from 1980. Included in the Part II total are a spectrum of crimes that range in seriousness from Class A felonies to violations.

Upstate reported 52.6% of the Part II Offenses and New York City the remaining 47.4%. In the Upstate area, criminal mischief offenses were the largest category, making up 30.1% of the Part II offenses. In New York City, the "all other offenses" category, which includes local laws, accounted for 50.7% of the Part II total.

The clearance rate for Part II offenses was 61.2%, influenced by cases where the offense and arrest occur almost at the same time.

PROPERTY STOLEN

In 1981, a total of $1,279,691,552 was reported stolen during the commission of Part I offenses, a 7.8% increase from the previous year. Property recovered from these Part I offenses amounted to $151,665,964. The value of stolen motor vehicles continued to account for the largest segment of stolen property, making up 38.4% of the total value of property stolen. Jewelry and precious metals accounted for an additional 19.6%. The value of property stolen in burglaries was more than double that taken in larcenies and was almost six times that stolen in robberies.

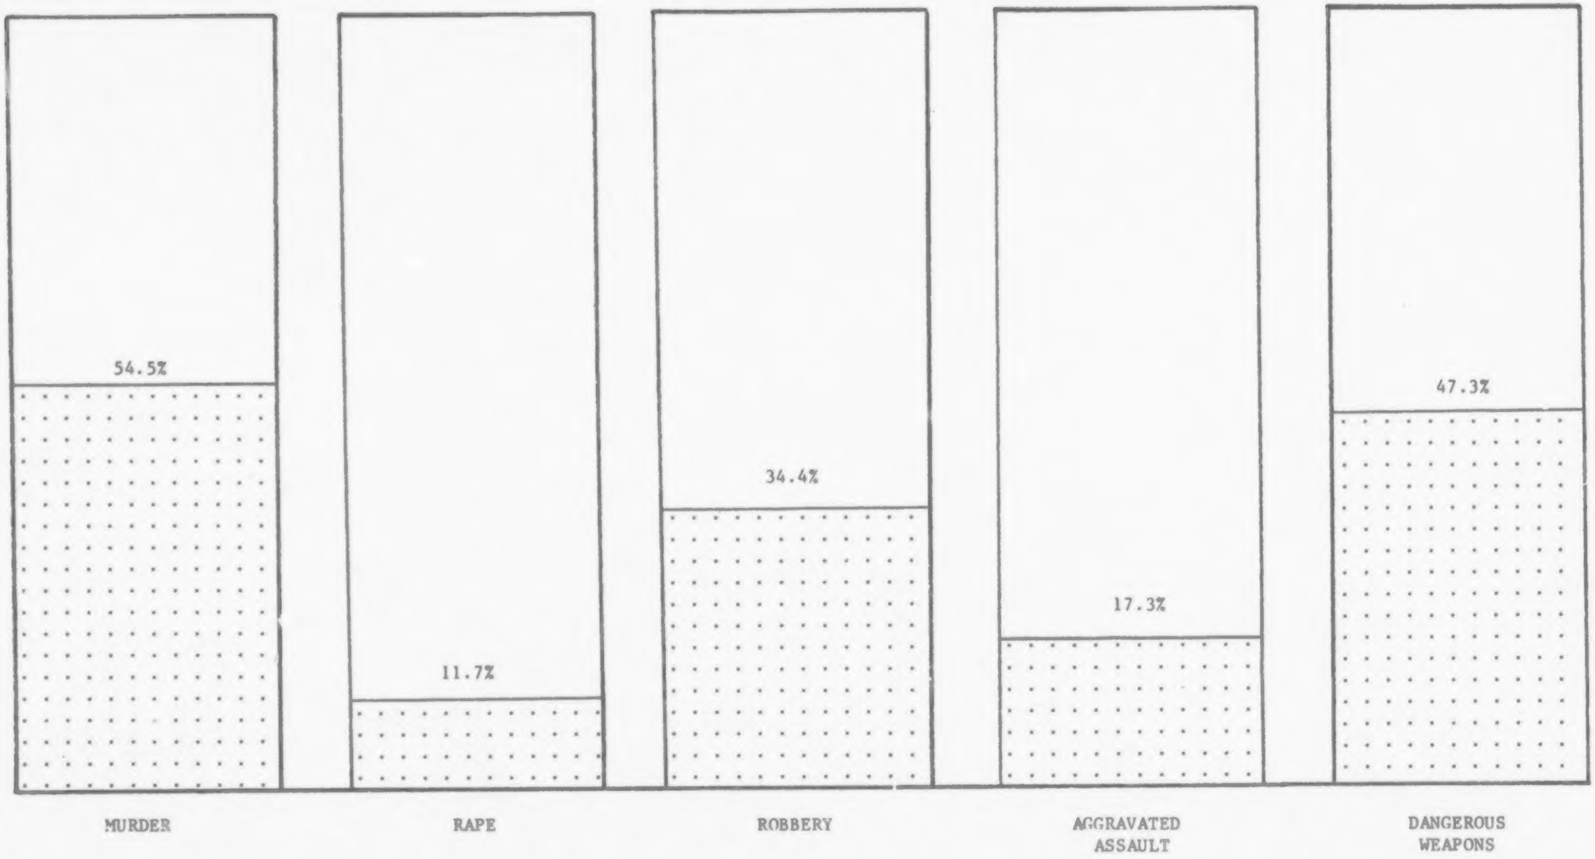
PERCENTAGE OF HANDGUNS INVOLVED IN SPECIFIED OFFENSES
NEW YORK STATE
1981



HOMICIDE 1981

The Offense

Table 1 presents data on homicide trends by month and region of the State. There were 2,177 homicide offenses [1] in New York State during 1981. This is slightly more than the number of homicides two years ago (2,098) but less than the number reported last year (2,228) possibly indicating a leveling of the upward trend noted since 1978.

While there was a net decrease of 51 homicides since 1980 for the State as a whole, the decrease was not proportionately distributed among the three regions of the State.[2] The most populous region, New York City, showed a negligible percentage increase in homicides (.7%) from 1980 to 1981. The least populous Other Areas showed a decrease of 5.3 percent. However, the MPA region showed a very substantial 20.4 percent decrease in the number of reported homicides. This was a complete reversal of the 18.5 percent increase in the number of homicides for the MPAs between 1979 and 1980.

In 1980, the most recent year for which comparable national data are available, New York's homicide rate of 12.7 per 100,000 inhabitants was the tenth highest in the nation.[3,4]

The peak month for homicides was December, a finding generally consistent with data from previous years in New York State. Unlike prior years, the number of homicides in New York State did not increase in each quarter during 1981. Despite this, the overall quarterly trends do not appear substantially different than in earlier years.

---

[1] A homicide offense was counted for each victim of a homicide event. If five persons were killed during a single event, this was counted as five homicide offenses. The homicide offenses discussed in this analysis are limited to those reported by New York State police agencies for 1981. They may include some homicides that occurred earlier but were not discovered until 1981.

[2] The regional groupings used in this analysis are: "New York City," the aggregation of the five boroughs comprising the City; "Other Metropolitan Planning Areas" (MPAs), a grouping of the six largest counties outside of New York City (Listed in Table 1); and "Other Areas," consisting of the remaining counties of the State.

[3] Federal Bureau of Investigation, Uniform Crime Reports - 1980, (Washington, D.C.: U.S. Department of Justice, 1981).

[4] This does not include Puerto Rico or the District of Columbia.

In New York State homicide was essentially a New York City phenomenon. While New York City contains less than 50 percent of the State's population, /5 it accounted for the bulk (84 percent) of the homicides. Of the remaining homicides, ten percent of the total occurred in the MPAs, and six percent in the Other Areas. These proportions have remained essentially unchanged for the last five years.

Table 2 presents data for the last five years on characteristics of homicides: victim/offender relationship, circumstances, number of victims and offenders, location, and weapon used. In half of the 1,193 homicides for which the victim/offender relationship was known, the victim and offender knew each other. More than half for which the circumstances were known occurred in connection with an altercation. Just over one-half of all homicides occurred indoors. More than one out of every ten homicides (12.4 percent) was a group crime involving multiple offenders. The weapon most frequently used was a firearm (58.6 percent), generally a handgun, followed by cutting or stabbing instruments (24.5 percent).

There are indications that in recent years, homicides in New York State have become increasingly more likely to result from predatory violence. For example, in those cases where the victim/offender relationship was known, the victim was equally likely to be killed by a stranger as by an acquaintance. This represents a steady increase since 1978 in the proportion of victims who were killed by strangers. /6 Also, since 1978 there has been a general increase in the proportion of homicides occurring outdoors, a location generally suggesting street violence. Finally, there has been a general increase in the percentage of homicides that were robbery related during the same time period.

Table 3 shows that in addition to contributing disproportionately to the overall total of homicide cases in the State, New York City's homicides appear to be more related to "street" violence than homicides in the rest of the State. New York City homicides were three times more likely to be perpetrated as a group crime (24.1 percent versus 8.3 percent); twice as likely to involve the use of a handgun (59.8 percent versus 26.3 percent) and twice as likely to take place in conjunction with a robbery (33.4 percent versus 15.9 percent). They were also more likely to occur outdoors /7 (50.7 percent versus 38.5 percent). New York City homicides were less likely than homicides occurring elsewhere in the State to involve victims who were white or female, or who were under ten or over sixty years of age. These patterns are generally similar to those noted in 1980.

/5 Bureau of the Census, 1980 Census of Population and Housing: New York, Final Population and Housing Unit Counts, (Washington, D.C.: U.S. Department of Commerce, 1981).

/6 These figures are based on the 55% of the cases for which data on the circumstances of the offense were known. It is reasonable to argue that homicides by strangers were less likely to be solved (and therefore to be included in these percentages), thus underestimating the true percentage of victims killed by strangers. If this selection effect remained relatively constant over the years, it would not invalidate comparisons with respect to the percentage distributions across the years.

/7 In this analysis, "outdoors" is defined as a location potentially observable by a police officer on patrol.

The Victims

Eighty two percent (82%) of the 2,177 homicide victims were male. More than one-half (57.5 percent) were 20 to 39 years old. Homicide victims were nearly equally divided between white (48.4 percent) and black (49.9 percent)./8 While the overall percentage of female victims was 17.7 percent, the percentage of females was higher in the extreme age groups (see Table 7): 38.1 percent among victims under ten years of age and 36.4 percent among victims sixty or more years of age. This close similarity in victimization between males and females in the extreme age groups is probably a result of similarities in lifestyle for both sexes during such age periods. "Because of sex role differentiation, sex is related to daily activities such as where time is spent, the number of interpersonal contacts, and the likelihood of encountering strangers. Although sex is a major indicator of lifestyle, it is a weaker indicator for the youngest and oldest members of society."/9 Under such conditions, the victimization rates of the sexes in these extreme age groups will tend to merge (see Table 5)./10

As expected, the killing of very young victims suggests that they died as a result of family abuse, while the killing of the elderly evidenced more predatory offender behavior (see Table 8). The very young were more frequently killed by a single offender, a non-stranger, with the use of "personal" weapons (i.e., hands, fists, etc.), indoors, and under circumstances unrelated to an altercation or the commission of another felony./11 These results were consistent with an Illinois study of murders involving children. In that study, "The leading cause of murder of children age four and under in Illinois from 1976-1980 was abuse by a family member..."/12

The elderly were more likely than younger age groups to be murdered by multiple offenders, or in conjunction with the commission of another felony. For victims ten years of age or older, there is no clear relationship between victim age and the probability of being killed by a stranger (Table 8).

/8 Prior to 1981 Hispanics were coded as a category of the race variable. In 1981 a new variable, Ethnicity, was created which has two values: Hispanic and non-Hispanic. Because of this change, the distributions for race for 1981 are not comparable to those of earlier years. Given the high rate of non response to the new ethnicity variable (common when changes in reporting are made) this variable cannot be considered indicative of the true incidence of Hispanic offenders and victims in 1981.

/9 Hindelang, Michael J., Michael R. Gottfredson, and James Garofalo. Victims of Personal Crime: An Empirical Foundation for a Theory of Personal Victimization. (Cambridge, Mass.: Ballinger, 1978). p. 248.

/10 Ibid.

/11 Of the 63 victims under age ten, 20 were less than one year old.

/12 Miller, Louise S., and Carolyn R. Block. "Most Murders of Children Caused by Family Abuse," The Compiler, 3, No. 4 (May, 1982), p.3.

Male victims were more likely than female victims to be killed by a group of offenders, or by a stranger, or with the use of a firearm, or outdoors. In contrast, female victims were more likely to be killed by a single offender, or by a family member, or indoors. Homicides of female victims were more likely to result from stabbing, bludgeoning, or strong arm methods (Table 9). Homicides involving female victims suggested a more domestic environment than do homicides in which the victim was a male.

As noted earlier, these different circumstances were probably due to differences in lifestyle between males and females. Despite differences in lifestyle, however, the majority of male and female victims were solitary victims and the majority of both sexes were killed by a single offender (Table 9).

There was little relationship between the race of the victim and the weapon used or the victim/offender relationship. Approximately 50 percent of all victims were killed by handguns regardless of race. Forty-seven percent (47%) of whites were killed by someone they knew. For blacks, the percentage was 53.5 percent. There was a stronger relationship between victim race and circumstances of the homicide. For black victims, 60.5 percent were killed during an altercation; for white victims, the comparable figure was 46.9 percent (Table 10).

The Offenders

As with victims, homicide offenders were predominantly male (92.3 percent)./13 Over one-half (57.3 percent) of offenders whose race was known were black. Offenders appeared to be, on the average, younger than victims. These patterns have been fairly consistent for the past five years./14 However, since 1978 it appears that the percentage of offenders who were male, or in the 16 to 19 year age group has increased slightly.

The propensity to commit group homicide was strongest among offenders under twenty years of age and weakened sharply for older offender groups. Older offender groups tended to be arrested for relatively fewer felony connected homicides than younger offenders and to victimize strangers less frequently (Table 14). For offenders less than sixty years of age, there is little relationship between age and handgun use. Homicides by those over age 60 were generally ~~suggestive~~ of domestic rather than "street" encounters: 76.5 percent were not criminally motivated; all were single offender crimes in which the victim was usually a non-stranger; and 90 percent occurred indoors.

/13 Since arrests were not made in all cases, characteristics of offenders are not known in all cases. The percentages on the characteristics of homicide offenders are based only on those cases where an arrest was made and offender characteristics were reported. The reason there are more reported offenders than victims is that several offenders are often arrested for the murder of a single victim.

/14 This statement does not apply to race characteristics because coding of the race variable was changed for 1981 and thus the 1981 data are not comparable to earlier years.

A slightly higher percentage of black offenders were female than was the case for white offenders (Table 15).

Female offenders were less likely to engage in group homicide, or to use handguns, or to be criminally motivated than were male offenders. They were more likely to commit homicide indoors, or to kill a family member, or to kill during an altercation; circumstances which are suggestive of domestic violence (Table 16).

With regard to the number of offenders involved and the type of weapon used, there was very little difference between the races on these characteristics. In fact, for those cases for which data were available, the distribution was almost identical. For the circumstances of the homicide, blacks and whites were about equally likely to kill as a result of an altercation. However, 41.0 percent of the black offenders killed someone during a robbery while this was true of only 28.0 percent of the white homicide offenders (Table 17).

Homicide offenders clearly victimize members of their own race with little difference between white and black offenders. Approximately 84 percent of the white offenders were arrested for killing white victims while approximately 80 percent of the black offenders were arrested for killing black victims (Table 18).

The data for 1981 suggest a tendency of offenders to victimize persons of similar age to themselves that was not evident in 1980. This relationship between offender and victim age appears to strengthen in the older offender groups (Table 20).

Summary

These data on 1981 homicides show strong similarities with data from previous years: the vast majority of homicides occurred in New York City and were committed by males on male victims. A majority involved the use of firearms, specifically handguns, and most were perpetrated on victims of the same race as the offender. In general, the murders of the very young and very old and of females suggested domestic rather than "street" settings. There is, however, an indication in the data that murders resulting from predatory violence may be on the rise. When viewed over the last several years, the proportion of homicides involving strangers, occurring outdoors and resulting from the comission of a robbery have increased. In addition, from 1978 to 1980, the rate of homicides per 100,000 persons in New York State has also increased.

Total	100.0	100.0
	(339)	(147)

---

*The total number of cases on which the percentages are based is shown enclosed in parenthesis. This total excludes cases with missing or unknown data, hence it may differ from the total shown for other variables in this table or, for the same variable in other tables. Percentages do not always add to 100.0 due to rounding.

Because of the high rate of non reporting for ethnicity, these results cannot be considered indicative of the true incidence of Hispanic offenders or victims in 1981.

Table 4

SELECTED CHARACTERISTICS OF HOMICIDE OFFENSES IN WHICH FIREARM WAS USED AND NOT USED NEW YORK STATE 1981

(Percent*)

*The total number of cases on which the percentages are based is shown enclosed in parenthesis. This total excludes cases with missing or unknown data; hence, it may differ from the total shown in other tables. Percentages do not always add to 100.0 due to rounding.

**Because of the high rate of non reporting of ethnicity, these results cannot be considered indicative of the true incidence of Hispanic offenders or victims in 1981.

ARSON INCIDENT STATISTICS
NEW YORK STATE 1981

This is the third analysis of arsons in New York State to be presented in the annual Crime and Justice report. The data for these analyses are derived from a supplementary arson data collection program begun in 1979 under the Uniform Crime Reporting (UCR) System.

Arson is defined by the Uniform Crime Reporting program as a willful or malicious burning, or attempted burning, of a dwelling house, public building, motor vehicle, aircraft, or personal property of another. Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. A "cleared" arson incident is defined as an offense for which a perpetrator has been taken into custody or is otherwise known by police to have committed the crime, but cannot for reasons outside police control, be taken into custody.

Arsons reported under Part II of the UCR program and shown elsewhere in this volume are reported under the "hierarchy rule," whereby an offense is counted only if it is the most serious in an incident. Under this program, an arson offense is reported regardless of whether it occurred in conjunction with a more serious offense. This analysis, therefore, shows more arson offenses than are shown for arson in the UCR Part II offense presentations.

In the tables that follow, reported and cleared arson incidents are categorized according to region, type of property, and month of occurrence. Data are presented for New York State as a whole and are then divided according to the region in which the incident occurred. The three regions into which the data are divided are: New York City (the largest Metropolitan Planning Area in the State), Other Metropolitan Planning Areas (MPAs) and Other Areas. Other Metropolitan Planning Areas include the six largest counties outside of New York City: Erie, Monroe, Nassau, Onondaga, Suffolk, and Westchester. Other Areas are the remaining counties of the State including the upstate suburban and rural areas.

Type of property is divided into three categories: structural (including residential, commercial, and other), mobile, and other property. These are more fully defined in the footnotes following the data tables.

As in previous years, estimated values of property damaged were not uniformly reported and, therefore, were not included in the analysis.

Arsons Reported

There were 14,301 arson incidents reported in New York State in 1981 (Table 1). Almost 63% of these incidents (9,000 cases) occurred in New York City, while the other Metropolitan Planning Areas and the Other Areas accounted for 23.5% (3,358 cases) and 13.6% (1,943 cases) respectively.

Arsons of structures accounted for 82.2% of all arson incidents in New York State. In New York City, structural arsons accounted for 88.9% of all arsons reported, while in the MPAs and the Other Areas they accounted for 65.2% and 80.6% of all arsons, respectively.

Consistent with data from previous years, residential structure arsons remained the most common type of structural arson throughout the state. Examination of these residential structure arsons shows that in New York City the vast majority were "other residential" arsons, a category which includes structures such as apartments, tenements, and hotels. Almost 90% of all "other residential" arsons took place in New York City. Over 86% of the single occupancy residential structure arsons took place outside New York City, and constituted approximately one-quarter of the total arsons in both the Other MPAs and Other Areas.

Commercial structure arsons accounted for 15.4% of all arsons in New York State. A regional comparison shows that Other Areas had a higher proportion of commercial structure arsons than New York City and the Other MPAs. "Other commercial" structure arsons were the most frequent form of commercial arson in New York State (9.4% of the total).

There were 2,158 motor vehicle arsons reported in New York State accounting for 15.1% of all arsons. Over 63% of these occurred outside New York City. Almost 50% of all motor vehicle arsons occurred in the Other MPAs, while only 14.1% occurred in the Other Areas.

The number of arsons reported each month (Table 2) remained relatively stable throughout the year. The peak month for arsons in all three regions was May, when 1,335 cases (9.3%) were reported, statewide.

Abandoned Structures

Tables 3 and 4 highlight arsons of abandoned structures. These accounted for 28.9% of all arsons in New York State. In New York City 36.1% of all arsons involved abandoned structures. For the Other Metropolitan Planning Areas, the proportion was 20.4%, and for the Other Areas it was 10.7%.

Statewide, residential structures were the most common form of abandoned structures to be targets of arson, with the likelihood greater in New York City than in the other two regions of the State. Almost all arsons in the other residential category of abandoned structures occurred in New York City (96.3%), while only 28.7% of arsons of single occupancy abandoned structures occurred there. Other MPAs accounted for over half (56.7%) of all single occupancy abandoned structure arsons, with only 14.6% occurring in the Other Areas.

Arson Incidents Cleared

In 1981, 1,476 arson incidents were cleared (see Table 5). Of these, 1,258 (85.2%) were structure arsons, of which 807 (54.7%) were residential, and 258 (17.5%) were commerical. In all three regions of the state, most clearances were of arsons in the residential category. In New York City, clearances of residential arsons accounted for 73.8% of the total cleared; in the Other MPAs this percentage was 50.3%, and in the Other Areas it was 43.2%.

The 1981 clearance rate for all arsons in New York State was 10.3%, a slight increase over that shown for 1980 (Table 7). This relatively low clearance rate seems to reflect the extreme difficulty in solving a crime in which most of the physical evidence is destroyed. (The clearance rate is the ratio of clearances to the total number of arsons reported, expressed as a percent. Because a 1981 clearance does not necessarily reflect clearance of an offense reported in 1981, the clearance rate should be considered only as a general indicator of processing efficiency).

Arson clearance rates varied by the type of property, although the variation was less than that noted for 1980. Statewide, the highest clearance rate, 21.4%, was in the public/community category and the lowest, 4.7% was in the industrial and manufacturing category.

Clearance rates in New York City were relatively constant across all property types, with an average rate of about five incidents cleared for every 100 reported. This represented an increase over the 1980 clearance rate.

Clearance rates in the two other regions of the State were considerably higher, averaging about twenty clearances for every 100 reported arsons. There was more variation among the property types, with the lowest rates occurring in the "other mobile" category in both regions. "Other property" showed the highest rate of clearance in the MPAs while public/community arsons were cleared most often in the Other Areas.

As in the previous two years, clearance rates remained relatively stable throughout the year. For the State as a whole, they ranged from a low of 7.7% in July to a high of 12.8% in December (Table 8).

Table 9 presents data on arson clearances involving persons under 18 years old. A comparison with the overall clearance data presented in Table 5 shows that 29.1% of all clearances in the State involved persons in this age group. The proportion of "under 18" clearances varied among the three regions. In New York City, 12.7% of the clearances involved persons under 18 while in the MPAs the proportion was 37.0% and in the Other Areas it was 33.7%.

In summary, over 14,300 arson incidents were reported in New York State in 1981. Almost 63% of these arsons occurred in New York City. Statewide, over 82% of the reported arsons were structure arsons; 60.5% were residential arsons, and 28.9% were arsons of abandoned structures. Clearance rates for arson incidents statewide was 10.3%, and ranged from 4.6% in New York City to 23.8% in the Other Areas.

LIST OF FOOTNOTES
For Arson Tables 1 - 10

[a] Includes Erie, Monroe, Nassau, Onondaga, Suffolk and Westchester counties.

[b] Includes apartments, tenements, flats, hotels, motels, inns, dormitories and boarding houses.

[c] Includes warehouses, garages and barns.

[d] Includes stores, restaurants and offices.

[e] Includes churches, jails, schools, colleges and hospitals.

[f] Includes out-buildings, monuments and structures under construction.

[g] Includes airplanes, boats, trailers and recreational vehicles.

[h] Includes crops, timber, fences and signs.

The Governor's Task Force on Domestic Violence was established by Executive Order #90 on May 17, 1979, to study "the traumatic effects of domestic violence and how our social and legal systems can better deal with such violence and its causes."

DCJS utilizes the Uniform Crime Reporting System (UCR) as the data collection instrument for obtaining domestic violence information. The data collection format was revised in 1981 at the request of the Domestic Violence Task Force. The offense of Violation of Protective Order was added and the offenses of Reckless Endangerment and Menacing were combined into the "Other Offense" category. In addition, a new victim category, "Other Family Relationships" was added in order to provide a means for recording domestic violence among other family members (aunts, uncles, grandparents, etc.).

The addition of the "Other Family Relationships" victim category resulted in an inordinate number of domestic violence cases being reported in this category by the New York City Police Department (NYCPD). The majority of the offenses reported in this category should be proportionately distributed in other victim categories. This reporting anomaly was due to the fact that the NYCPD offense report used to collect domestic violence data during 1981 did not adequately provide for recording the victim/offender relationship. A new offense report form was implemented in January 1982 and henceforth, the victim/offender relationship will be more accurately reported by NYCPD.

Domestic violence data reflected in this report are based on those offenses which come to the attention of police, regardless of whether a formal complaint or arrest is made. Instances of domestic violence in which a child is victimized by parent(s), commonly referred to as child abuse, appear to be under-reported in New York City. This lack of reporting is due to the fact that most reports of child abuse are made by a third party and are reported directly to a social services or child welfare agency instead of the police department. In addition, the NYCPD offense reporting system did not provide a mechanism for collecting information on Violations of Protective Orders during 1981. Efforts are being made to improve the reporting in 1982.

The volume of domestic violence offenses reported in New York State in 1981 reflects a significant increase from the data reported in 1980 (25,998 in 1981 vs. 6,604 in 1980). This increase is largely attributable to improved reporting by the law enforcement agencies across the state. Although great strides were made in improved reporting in 1981, much work remains to be done. DCJS will continue to monitor the data collection effort during 1982 and will follow-up on any continuing problems on an agency by agency basis.

THE

RESPONSE

ARRESTS

The 883,164 arrests reported in New York State in 1981 include 776,598 adults and 106,566 juveniles, of which 754,435 were males and 128,729 females. Total arrests in 1981 exceeded the 823,983 arrests for 1980 by 7.2%. Male arrests were up 5.7% and female arrests 16.7%.

Arrests for Index offenses -- murder and non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny and motor vehicle theft -- totaled 181,665, 1.4% above the 179,243 reported in 1980. Arrests for Index offenses made up 20.6% of the State arrest total.

Violent offenses -- murder and non-negligent manslaughter, forcible rape, robbery and aggravated assault -- resulted in 52,934 arrests, 6.0% of the total arrests and a 4.2% increase from 1980.

Arrests for non-violent offenses -- burglary, larceny, and motor vehicle theft -- numbered 128,731, 14.6% of the arrest total and a 0.2% increase from 1980.

Part II offenses resulted in 701,397 arrests, 79.4% of all arrests and an 8.8% increase from 1980.

Among the individual Index offense categories, robbery arrests showed the greatest increase from 1980 to 1981, up 9.9%; arrests for persons fourteen through twenty-one accounted for 60.7% of the robbery arrests compared to 48.2% for the other Index offense categories.

Arrests for murder and non-negligent manslaughter, aggravated assault, burglary, and motor vehicle theft declined, while those for forcible rape and larceny increased.

Arrests of individuals fourteen through twenty-one years of age accounted for 59.4% of the burglary arrests and 57.4% of the arrests for motor vehicle theft.

ADULT ARRESTS

The 776,598 adult arrests reflected a 5.2% increase over the 737,950 adult arrests reported in 1980. Male arrests were up 4.1% and female arrests 12.9%.

Adult arrests were responsible for 87.9% of all arrests, 80.7% of the arrests for Index offenses, 87.2% of the arrests for violent offenses and 78.1% of the arrests for non-violent offenses.

With the exception of the "all other offenses" category, the larceny category had the largest number of adult arrests - 62,179. The proportion of female arrests for larceny was relatively high, accounting for 29.8% of the total. For all arrests, females made up only 14.1% of the total.

Offense categories where adult arrests showed a significant increase from 1980 to 1981 are: liquor law violation 122.2%, drugs 29.7%, prostitution 29.4%, robbery 12.9%, and fraud 8.4%. Arrests for burglary offenses registered a drop of 7.4% and arrests for simple assault were down 5.5%.

Adults under twenty-five accounted for 57.1% of the adult arrest total and 60.1% of the adult arrests for Index offenses. Teen age adults alone were responsible for 30.0% of the adult arrest total although they made up only 9.5% of the adult population.

FELONY ARRESTS

Felony arrests are presented for 1977 through 1981 for New York State, New York City, the Suburban Area of New York City and Upstate as well as each county.

Statewide, a total of 136,459 felony arrests were reported in 1981, 3.7% above the 131,556 felony arrests reported for 1980. The 1981 total exceeded each of the four previous years and was 6.9% above the 127,605 felony arrests reported in 1978.

Drug arrests accounted for 11.9% of the felony arrests in 1981 and showed a 30.3% increase from 1980.

In New York City, felony arrests were up 5.6% and felony drug arrests 38.8% The increase in felony drug arrests, which made up 14.2% of the felony arrest total, was largely responsible for the overall increase in felony arrests in New York City. New York City accounted for 67.1% of the total felony arrests in New York State and 80.5% of the felony drug arrests.

In the Suburban Area of New York City, felony arrests declined 2.3% from 1980 to 1981, while felony drug arrests rose 6.7%. Felony arrests in the Suburban Area of New York City made up 11.6% of the State total and felony drug arrests constituted 8.6% of the State total.

Upstate showed a 1.5% increase in felony arrests and a 2.1% increase in felony drug arrests. The Upstate area accounted for 21.4% of the State felony arrest total and 11.0% of the felony drug arrest total.

JUVENILE ARRESTS

Juvenile arrests totaled 106,566 in New York State in 1981, 23.9% above the 86,033 reported in 1980. Male arrests were up 20.1% and female arrests increased 44.6%. The large increase in female arrests was largely reported in the "all other offenses" category. Juvenile arrests were dominated by the fourteen and fifteen age groups, who combined to account for 67.1% of juvenile arrests. Arrests of juveniles accounted for 18.1% of robbery arrests, 24.7% of burglary arrests and 21.8% of larceny arrests.

NEW YORK CITY

Arrests in New York City accounted for 61.1% of the State total in 1981 and 74.9% of the arrests for violent offenses. Juvenile arrests in New York City accounted for 69.8% of the statewide juvenile arrest total.

Total arrests for New York City showed a 12.3% increase from 1980 to 1981, with arrests for violent offenses up 7.0%.

For liquor law and prostitution offenses, New York City arrests made up more than 90% of the State total and for robbery, motor vehicle theft and gambling offenses, more than 80% of the total arrests.

DRUG ARRESTS

Statewide, drug arrests were up 28.0% from 1980 to 1981, with arrests for sale showing a 44.9% increase and arrests for possession up 22.0%. Combined sale and possession arrests for opium, cocaine and derivatives showed a 48.3% increase. Arrests for sale were up 71.9% and arrests for possession increased 32.4%. Both sale and possession arrests for opium, cocaine and derivatives were concentrated in New York City, with New York City reporting 89.5% of the arrests for sale and 82.8% of the arrests for possession.

Arrests for the sale of marijuana showed a 32.6% increase and 72.4% of the State total was reported by New York City. Possession arrests for marijuana were up 23.5% statewide and the New York City share of the State total was 53.6%.

DANGEROUS WEAPONS

Arrests for dangerous weapons showed a 6.5% increase statewide, with 61.5% of the weapon arrests reported from New York City. Arrests in this category include all dangerous weapons and are not limited to handguns or other firearms.

RACE & ETHNIC ORIGIN DATA

A comparison of arrests by race shows whites accounting for 57.4% of the total arrests, blacks 41.9%,and Indians and Asians 0.7%.

Ethnic arrest data lists arrests for non-hispanics as making up 83.5% of the total and hispanics 16.5%.

Race and ethnic origin data are not available for the entire arrest population due to incomplete reporting. In addition, race and ethnic origin data had to be estimated for over 300,000 summonses reported by New York City, since existing forms do not provide for the reporting of these data.

INDICTMENTS AND DISPOSITIONS

The following tables represent statistical data on felony indictments, superior court informations and dispositions for 1980 and 1981. The information is obtained from a statistical reporting system based on individual reports of each indictment, each superior court information and each disposition submitted by District Attorneys and Special Prosecutors throughout the state. The unit of count in this reporting system is the defendant/indictment. This includes all defendants indicted and all indictments/superior court informations processed as follows:

1. When several defendants are named in one proceeding or indictment, each defendant is counted separately.

2. When one defendant is named in multiple proceedings or indictments, each indictment is counted separately.

The tables include data on New York State, New York City, the Suburban Area of New York City (Nassau, Rockland, Suffolk and Westchester counties), Upstate, and the four Judicial Departments in New York State.

Tables of data are presented for three categories:

1. All Felony Charges

2. All Felony Drug Charges

3. Class A Drug Charges

The use of offender based statistics and the tracking of each defendant from time of indictment until final disposition makes possible the measuring of elapsed time between various stages in processing. The median is obtained by ranking all the values in a specific category (for example, time from indictment to disposition) and choosing the middle number -- that is, the number with an equal amount of values above and below it. As a result, median values are not influenced by very large or very small numbers which can affect averages.

It should be noted that the disposition data reported in these tables pertains to cases handled during the specified year by the Superior Courts. These dispositions may be for indictments in the same or previous years.

Defendant-Indictments

A record 41,470 indictments were reported in New York State in 1981, reflecting a 13.4% increase from the 36,566 indictments reported in 1980. New York City reported a 17.6% increase in indictments, the Suburban Area of New York City showed a 23.0% rise and Upstate was up 1.6%.

Indictments for drug offenses were up even more sharply, with New York State showing a 27.0% increase from 1980 to 1981. New York City reported drug indictments up 34.5% and the Suburban Area of New York City reflected a 26.1% gain. In the Upstate area, drug indictments were up 4.0% from the previous year.

Class A drug indictments declined in all areas. This continued decline in Class A drug indictments can be attributed to a revision in the Penal Law, effective September 1, 1979, which eliminated Class A-III drug felonies and designated as Class B, the offense previously denoted as A-III.

Dispositions

A total of 37,566 dispositions were reported in New York State in 1981, 22.2% above the 30,749 dispositions reported in 1980. The total number of dispositions reported in 1981 was the greatest number recorded since the inception of this reporting program in 1973 and exceeded by 12.4% the previous high of 33,436 reported in 1976.

New York City showed a 31.9% increase in dispositions compared to a 30.6% rise in the Suburban Area of New York City and 2.9% Upstate.

Statewide, convictions numbered 31,102, accounting for 82.8% of all dispositions. The statewide conviction rate for 1981 was slightly above the 82.0% reported in 1980 and was the result of rising conviction rates in all geographical areas.

The number of trials in New York State increased from 3,353 in 1980 to 4,182 in 1981, an increase of 24.7%. Statewide, trials accounted for 11.1% of the dispositions. In New York City, 13.3% of the dispositions were the result of trials compared to 7.5% in the Suburban Area of New York City and 8.8% Upstate. For dispositions resulting from trials in New York State, 28.0% were acquittals and 72.0% were convictions.

From 1980 to 1981, the dismissal rate for New York City remained constant at 11.7%. In the Suburban Area of New York City the rate of cases dismissed dropped from 6.3% in 1980 to 5.5% in 1981. The Upstate area followed a similar pattern with the dismissal rate dropping from 8.1% in 1980 to 7.5% in 1981.

Statewide, guilty pleas accounted for 90.3% of all convictions, jury trials 8.5% and non-jury trials 1.2%.

Youthful offender adjudications made up 10.8% of the convicted total in New York City versus 18.1% in the Suburban Area of New York City and 17.3% Upstate.

In 1981, sentences to state prison made up 40.6% of all convictions in New York State versus 39.0% in 1980. In New York City, 50.5% of the convictions resulted in sentences to state prison compared to 32.8% in the Suburban Area of New York City and 26.5% Upstate. New York City registered a slight drop in its rate of sentences to state prison while both the Suburban Area of New York City and Upstate showed increases.

Statewide, sentences to local institutions increased their share of the convicted total from 16.7% in 1980 to 18.0%, while probation sentences decreased from 30.6% to 28.7%. Sentences that combine probation and incarceration showed a slight increase in their share of the convicted total, up from 8.4% in 1980 to 8.5% in 1981. This type of sentence accounted for only 4.9% of the convicted total in New York City compared to 14.7% in the Suburban Area of New York City and 11.7% Upstate.

Drug Dispositions

In New York State, dispositions of drug charges increased from 3,460 in 1980 to 4,167 in 1981, a 20.4% increase. Not only was there a greater number of drug dispositions but the conviction rate rose from 80.9% in 1980 to 82.9% in 1981. Fewer cases were adjudicated Youthful Offenders and a greater percentage of convicted cases received prison sentences. The number of trials increased from 258 to 301, up 16.7%. In 1980, 70.9% of the trials resulted in a guilty verdict compared to 80.1% in 1981. Class A drug dispositions continued to decrease, down from 1,645 in 1980 to 948 in 1981, a drop of 42.4%. This decline in Class A drug dispositions results from legislation eliminating Class A-III drug offenses.

Processing Time

The median time for processing indictments through dispositions was 110 days in 1981, the same number of days as in 1980 despite the 22.2% increase in the volume of dispositions.

Statewide, the median time to process drug dispositions decreased from 159 days to 130 days. This significant decrease was achieved in spite of the increasing volume of dispositions and trials.

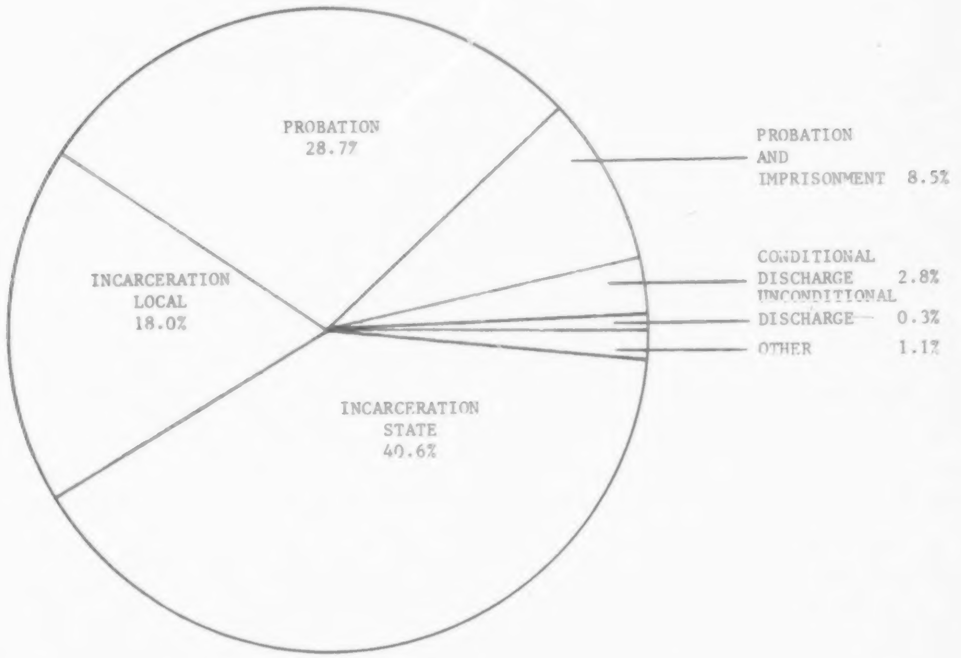
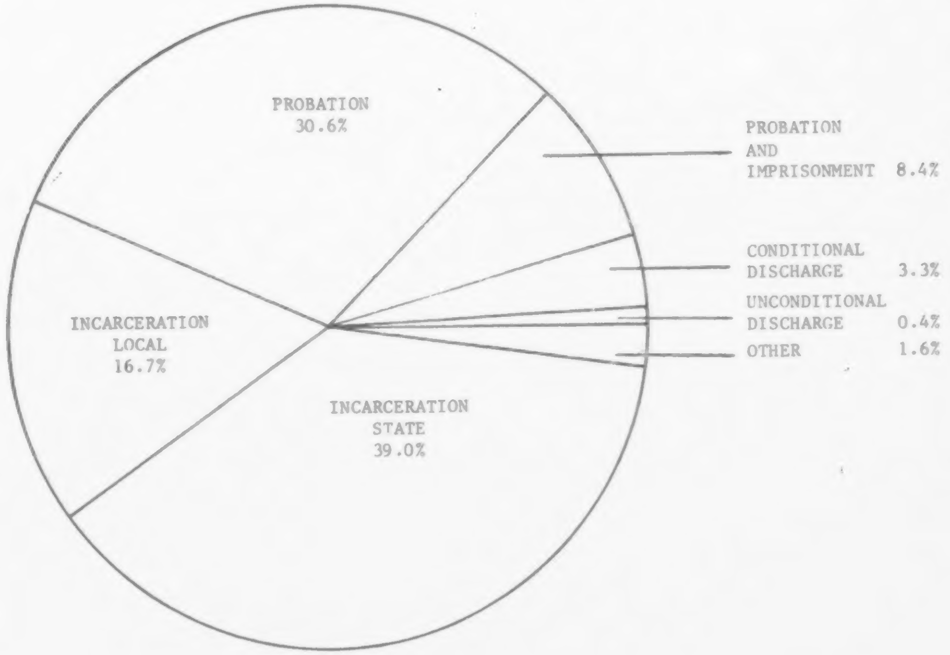
SENTENCES FOR CONVICTIONS OF FELONY DEFENDANT-INDICTMENTS
NEW YORK STATE
1981 - 1980

1981



1980



SENTENCES

Sentences for convictions of murder, rape, robbery, aggravated assault, burglary and larceny and attempts at these crimes are compared for 1980 and 1981. This comparison includes type of sentence, length of maximum sentence to state prison and maximum length of probation supervision. Included among these sentences are Youthful Offender adjudications and sentences for second and persistent felony offenders. These conditions of sentence may lessen or increase the severity of the sentences. As an example of the increased severity of sentence, there were 46 life sentences in 1981 for convictions other than Class A offenses.

In 1981, 65.7% of the convictions for these offenses resulted in sentences to state prison or local jail. An additional 7.8% received sentences of jail and probation.

Convictions for the more serious offenses (Class A, B, and C) made up 30.5% of the total sentences but accounted for 53.0% of sentences to state prison, 4.7% of the sentences to local jail and 11.7% of the probation sentences. Class D and E convictions constituted 47.0% of the prison sentences and 88.3% of the probation sentences.

Sentences for robbery, which range in seriousness from Class B to Class E, accounted for 41.4% of the sentence total but 53.6% of the prison sentences.

The median length of the maximum prison sentence for all offenses was 4 to 5 years.

COMPARISON OF ACTIVITY AT VARIOUS CRIMINAL JUSTICE TRANSACTION POINTS

In this comparison we have examined the offenses of homicide, robbery and drugs as the cases are reported at various points in the criminal justice system. Data shown for these offenses are obtained from several sources. Offenses and arrests statistics are compiled from monthly Uniform Crime Reports submitted to the Division of Criminal Justice Services by police agencies in New York State. The felony drug arrest data are obtained from fingerprint cards submitted to the Division in accordance with Section 160.20 of the Criminal Procedure Law. Data on indictment through sentence are provided on individual reports by District Attorneys and Special Prosecutors in New York State and the unit of count is defendant-indictments.

Data on indictment through sentence are not necessarily for arrests and offenses within the same year. Disposition data will also reflect in-indictment data from previous years.

Homicide

Homicide offenses, arrests and indictments showed a decrease in 1981 compared with 1980. In both 1981 and 1980, homicide indictments surpassed homicide arrests. This may be accounted for by several indictments being lodged against one defendant.

In 1981, 81.7% of the convictions based on homicide indictments received prison sentences, compared to 80.2% in 1980. For those cases where the conviction charge as homicide, 86.6% were sentenced to state prison in 1981 versus 85.8% in 1980.

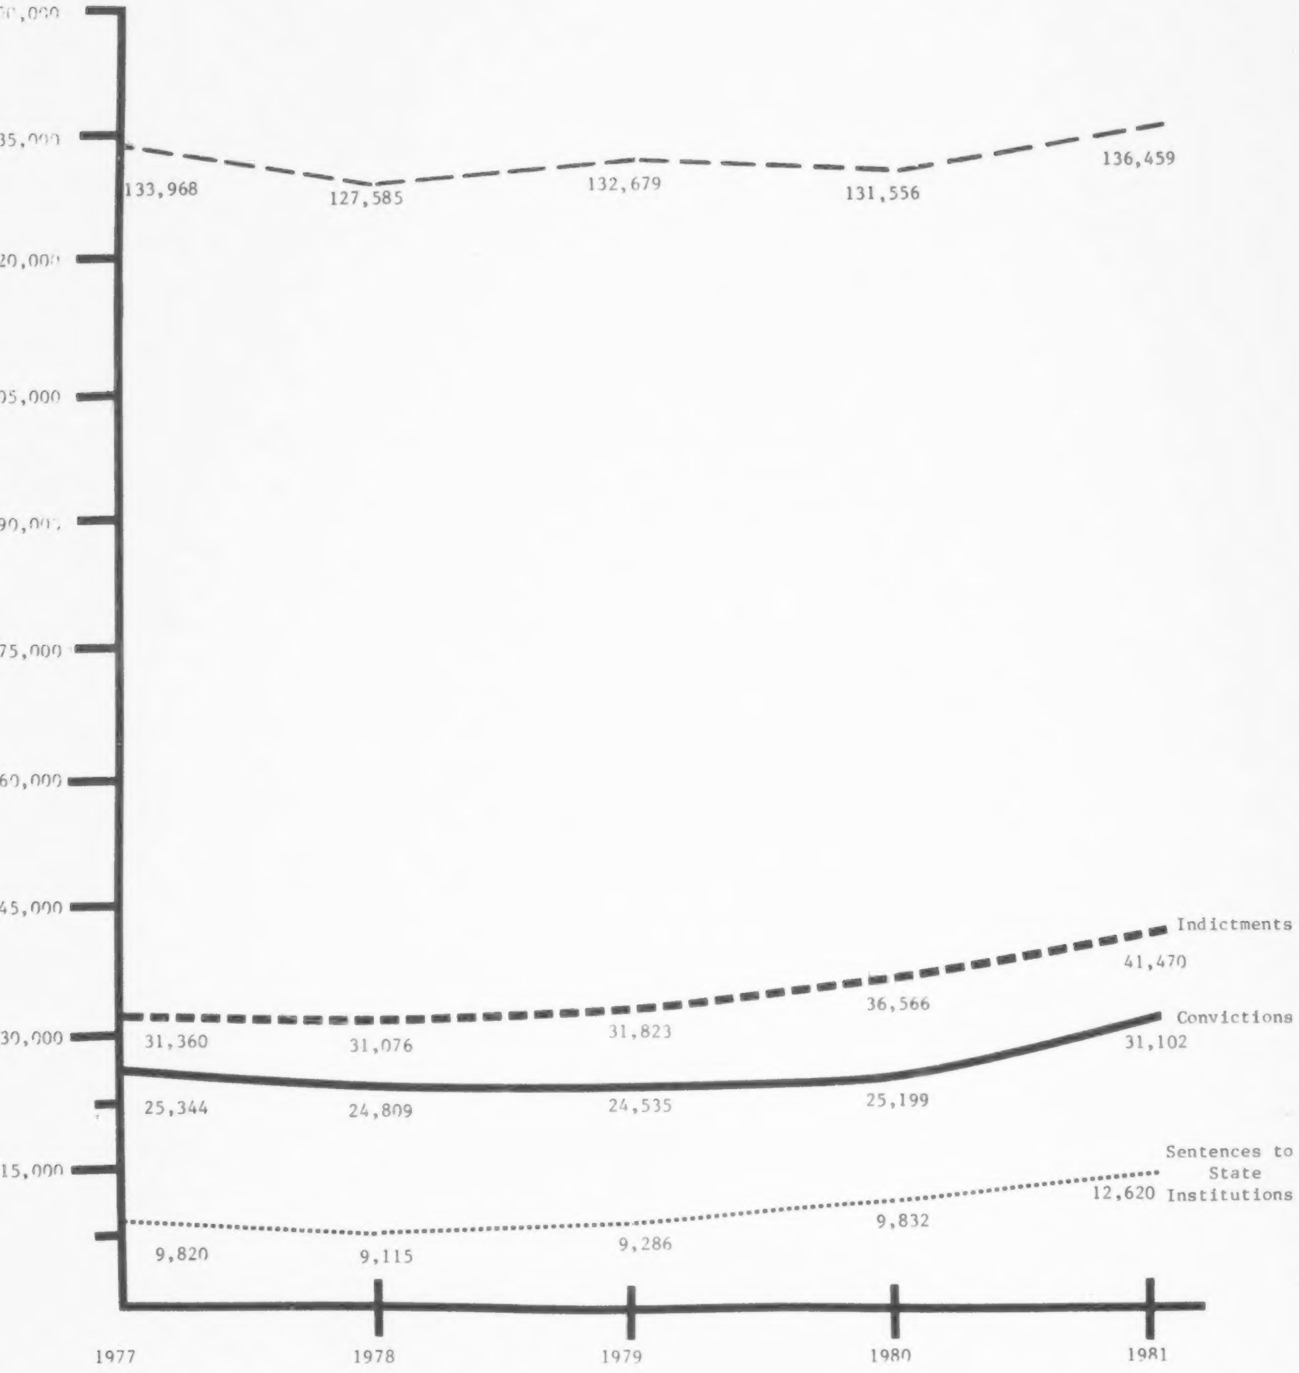
Robbery

Compared with 1980, the robbery category reflected increases at all points in 1981, from offense through sentence. Indictments registered a 18.4% increase in response to a 7.3% rise in offenses. 83.5% of robbery dispositions resulted in conviction with 61.6% of the convictions receiving sentences to state institutions.

Drug Felonies

Felony drug changes are shown for the five year period from 1977-1981. Felony drug arrests in 1981 showed a 30.3% increase over 1980, while convictions increased 24.4% and sentences to state institutions rose 27.2% during the same period.

FELONY CHARGES AT VARIOUS STAGES OF THE CRIMINAL JUSTICE PROCESS



HOMICIDE CHARGES AT SELECTED STAGES OF THE JUDICIAL PROCESS

NEW YORK STATE CRIMINAL JUSTICE PROCESSING
CASES DISPOSED IN 1979

This analysis summarizes a study of the characteristics and criminal justice processing of 106,220 adult felony arrests which were disposed in New York State in 1979. The full study, prepared by the Research Unit of the Office of Program Development and Research, is presented in a report published April 6, 1982, entitled Felony Offenders Disposed in 1979. Data for the study were obtained from the Computerized Criminal History/Offender-Based Transaction Statistics (CCH/OBTS) data system maintained by the New York State Division of Criminal Justice Services.

The analyses reflect those felony arrests for which a final 1979 disposition was reported to the Division. It is estimated that approximately 20 percent of the actual number of arrests were unavailable for analysis due to non-reporting of dispositions.

An assessment of the validity of the CCH/OBTS data used for the report was made by comparing geographic, demographic and offense variables with an arrest-based data file that represents the population of all cases without regard to the problem of missing dispositions. There was found to be a close comparison between the two data sets with regard to the demographic and offense (type and class) variables examined. However, arrests from the more urban counties had a higher probability of being included in the OBTS analysis file than would be expected from the arrest-based data. This has the effect of overrepresenting the characteristics of urban cases in the data presented for the State as a whole.

In this summary, information is presented on system processing outcomes, the nature of arrest offenses, and the characteristics of persons arrested. These data are compared for three major geographic regions of the State: New York City, the six largest counties outside of New York City[a], and the remaining counties of the State.[b] "Tree" diagrams are presented to summarize how cases were processed in the three regions and for the State as a whole.

Criminal Justice Processing

In all regions, only a small proportion of arrests were disposed as a result of actions by prosecutors or grand juries. The vast majority of felony arrests were ultimately disposed in court, particularly the "lower" criminal courts. These are courts having jurisdiction over misdemeanor or lesser offenses only. Since all offenders in the study were arrested for at least one felony, it is clear that reduction in the seriousness of charges from arrest to disposition is relatively common throughout New York State.

Overall, almost six out of ten felony arrests resulted in a conviction. Conviction rates in misdemeanor courts were substantially lower than in upper, or felony courts, and dismissal rates in the misdemeanor courts were correspondingly higher. Most convictions were obtained by plea rather than by trial (particularly in the lower courts), and acquittals were rare.

---

[a] For planning purposes, these counties plus New York City are known as "Metropolitan Planning Areas" or "MPAs". These counties (excluding New York City) are referred to as "Other MPAs" or "MPAs."

[b] These jurisdictions are referred to as "Other Areas."

-- Statewide, 97.3 percent of the 106,220 arrests were disposed by court action; 78.0 percent in the lower courts and 19.3 percent in the upper courts.

-- Almost 58 percent of felony arrests ultimately led to conviction.

-- Among the cases processed in the lower courts, 53.0 percent led to conviction and 46.4 percent were dismissed. Less than one percent were acquitted.

-- Among cases processed in the felony courts, 84.5 percent were convicted and only 9.5 percent were dismissed. Slightly over four percent led to acquittal.

-- Convictions by plea accounted for 89.9 percent of lower court convictions and 75.6 percent of upper court convictions.

Persons convicted in the upper courts were most likely to receive sentences to incarceration, most of these being sentences to state prison. In addition, almost one-third of those convicted in the lower courts were sentenced to incarceration in the local jails. (Lower courts are not empowered to sentence persons to state prison.) In total, nearly four out of ten convictions resulted in some form of incarceration.

Probation was the most frequently imposed form of nonincarcerative sentence in the upper courts. In the lower courts, the use of nonincarcerative sentences varied by region of the State.

-- More than 47 percent of upper court convictions received sentences to state prison and an additional 16.3 percent were sentenced to local jail (or received "split" sentences which included some jail). Almost 29 percent received probation.

-- Almost 32 percent of lower court convictions received jail or split sentences. Slightly over 26 percent received conditional discharges; 21.3 percent were fined and 15.8 percent received probation in the lower courts, statewide.

Comparison of data by region shows differences along the rural/urban continuum, both in terms of processing patterns and in terms of the characteristics of the cases being processed. Differences between New York City and the rest of the State were particularly sharp. One consequence of these differences is that global analyses of statewide data tend to obscure upstate processing patterns, since more than 76 percent of the felony arrests disposed in 1979 occurred in New York City.

In addition to processing substantially greater absolute numbers of cases, New York City also processed a larger proportion of its cases through the lower courts than did the other regions, and obtained proportionately more convictions by plea.

Both lower and upper court conviction rates in the City were lower than in the rest of the State, but incarceration rates (and particularly sentences to state prison) were markedly higher. Probation was less likely to be used in the City, particularly for lower court convictions. Conditional discharge was the most common form of nonincarcerative sentence in New York City's lower courts.

-- Of the 106,220 felony arrests disposed in 1979 that were analyzed for the report, 80,986 (76.2 percent) were from New York City, 15,600 (14.7 percent) were from the other Metropolitan Planning Areas and 9,634 (9.1 percent) were from the Other Areas.

-- Almost 81 percent of New York City arrests were processed in the lower courts as opposed to 71.8 percent of arrests from the Other MPAs and 64.7 percent from the Other Areas.

-- Among cases processed in lower courts, conviction rates were 51.6 percent in New York City, 54.7 percent in the Other MPAs and 64.9 percent in Other Areas. More than 34 percent of court convictions received jail (or split) sentences in New York City, as opposed to 20.6 percent in the Other MPAs and 28.3 percent in the Other Areas.

-- Approximately 93 percent of New York City lower court convictions were obtained by plea. In the Other MPAs the percentage was 78.8 percent and in the Other Areas, 80.3 percent. For upper court convictions, the comparable figures are: New York City, 78.8 percent, Other MPAs, 73.1 percent, and Other Areas 67.5 percent.

-- Upper court conviction rates were 81.9 percent in New York City, 88.4 percent in the Other MPAs, and 89.4 percent in the Other Areas. Nearly 56 percent of these convictions resulted in sentences to State prison in New York City; 38.2 percent in the Other MPAs and 28.7 percent in the Other Areas. An additional 13.4 percent of upper court convictions received jail sentences in New York City. In the MPAs and the Other Areas, the figure was approximately 21 percent.

-- Slightly less than 25 percent of upper court convictions in New York City received probation. In the MPAs the figure was 32.0 percent and in the Other Areas, it was 39.0 percent.

-- Among nonincarcerative sentences for lower court convictions, conditional discharge was most frequently imposed in New York City (28.6 percent of convictions). In the MPAs, the most frequent such sentence was probation (28.7 percent of convictions) and in the Other Areas, fines were most common (24.7 percent).

Characteristics of Arrest Offenses

Almost one-half of the felony arrests in the analysis were for property crimes, with an additional one-third being for crimes against persons. Drug offenses accounted for less than ten percent of all arrests, statewide. Arrests for the more serious offense classes were relatively rare; more than 70 percent of all arrests were for class D and E felonies. (The more serious arrest offenses were generally drug or personal offenses while the D and E offenses were most often for Property crimes.)

The data show that the cases to which the New York City criminal justice system responded were qualitatively different from cases elsewhere in the State. For example, felony arrests in the City were more likely to involve multiple charges, were more likely to be for personal or drug crimes and were generally more serious than the arrest events from the other two regions. Arrests for attempted crimes were also substantially more common.

Some of these regional differences, however, may stem from differences in police resources or practices, and not from any inherent differences in the cases themselves. For example, increased investigative resources may result in the detection of additional offenses with the result that arrest events would be more likely to contain multiple charges.

- Arrests for personal crimes constituted 37.5 percent of the total arrests in New York City, 26.6 percent in the Other MPAs and 20.9 percent in the Other Areas. Drug offenses accounted for 9.8 percent of arrests in the City, but only 5.7 percent in each of the other regions.

- Nearly 16 percent of arrests in New York City were for class A and B felonies. In the Other MPAs, the figure was 10.5 percent and in the Other Areas it was 6.2 percent.

- Almost 92 percent of cases where the most serious charge was an attempt were from New York City. Attempted offenses were most often for personal crimes in New York City and for property crimes outside the City.

- Almost 76 percent of New York City arrests contained at least two charges as opposed to 35.8 percent from the Other MPAs and 30.0 percent from the Other Areas. Where there were multiple charges, the accompanying charges were most likely to be for misdemeanors. Such additional charges were more likely to accompany arrests for personal crimes in New York City and arrests for drug crimes elsewhere in the State.

Characteristics of Offenders

The 106,220 arrests analyzed in this report involved 86,568 different offenders. Eighty-four percent (84 percent), or 72,857 offenders, each accounted for only one arrest disposed in 1979. The remaining 16 percent, or 13,711, accounted for approximately 2.4 arrests per offender.

Data on these 86,568 offenders reveal that the overwhelming majority were male, regardless of region, and the majority were under age 25. In all regions of the State, offenders arrested for property crimes were younger than offenders arrested for other types of crimes; those arrested for the more serious felonies were generally older and more likely to have a prior record than those arrested for lesser felonies. Individuals arrested for crimes against persons were more likely to be nonwhite than offenders arrested for other types of crime.

- Males outnumbered females by a ratio of about 9 to 1 in all regions of the State. Offenders arrested for personal and property crimes were slightly more likely to be male than those arrested for drug or "other" crimes.

- Almost 56 percent of offenders were under age 25 at the time of arrest; 31.5 percent of the offenders were 16-19 years old.

- Slightly less than 41 percent of persons arrested for property crimes were in the 16-19 age group at the time of their arrest, as were 29.2 percent of the personal offenders and 19.9 percent of the drug offenders.

- Among those arrested for class A offenses, only 15.8 percent were 16-19 years old, as compared to almost 37 percent for those arrested for class C felonies. Class A arrestees showed the highest proportion with prior records of felony arrests (60.4 percent as compared to 41.7 percent for persons arrested for class E felonies).

- Sixty-five percent (65 percent) of offenders arrested for crimes against persons in New York State were nonwhite. This compares to 51.4 percent for property offenders and 59.8 percent for drug offenders.

Offender characteristics also differed markedly among regions. New York City offenders were older, more likely to be nonwhite and to have a record of prior arrests and convictions than other offenders. Among those with prior records, New York City offenders tended to have more severe records. In addition, New York City offenders were more likely than their non-City counterparts to have had more than one arrest which reached final disposition during 1979, suggesting a pattern of fairly intensive offending among City offenders. Taken with the other information on offenses and prior records, this depicts an offender population in New York City with a generally more extensive criminal background than is found outside of the City.

- Median ages for New York City offenders were more than two years higher than the other two regions. (Median ages: New York City, 23.8 years; MPAs 21.5 years; Other Areas, 21.2 years.)

- In New York City, 67.2 percent of offenders were nonwhite as compared to 36.8 percent in the MPAs and 16.8 percent in the Other Areas. New York City showed the only substantial representation of Hispanic offenders in the State.

- Almost 42 percent of all offenders had no record of prior arrests. The proportion is slightly lower in New York City and higher in the other regions. Nearly one-half of New York City offenders had at least one prior felony arrest as compared to 37.3 percent in the MPAs and 32.6 percent in the Other Areas.

- Fifty-nine percent (59 percent) of all offenders had no record of prior convictions. Among offenders with prior convictions, those convictions were generally for misdemeanor offenses. Almost 12 percent of New York City offenders showed at least one prior felony conviction. The comparable figure for the MPAs was 7.5 percent and for the Other areas, 6.5 percent.

These data on offenders are generally not sensitive to the kinds of processing idiosyncrasies noted eariler which may affect the data on offenses.

Nevertheless, sharp regional differences can still be noted and these support the general picture that serious crime is a phenomenon acutely affecting urban areas and New York City in particular. At the very least, the data demonstrate that the New York City justice system deals with a unique clientele and processes its cases differently than the various non-City jurisdictions.

LAW ENFORCEMENT OFFICERS KILLED OR ASSAULTED

During 1981, seven law enforcement officers were killed in the line of duty in New York State. The number of officers killed declined from 1980 when eleven officers were slain. In addition, 5,263 officers were assaulted while performing their law enforcement functions. This figure represents an increase of 11 percent over 1980 when 4,749 officers were assaulted.

This section of the report analyzes the circumstances surrounding these assaults. In 1981, 87 percent of the assaults resulted in personal injury to the officers.

Weapons

As in past years, physical force was the method most used in assaulting officers -- 78.1 percent. Handguns were next at 10.2 percent, followed by Other Dangerous Weapons at 6.4 percent, Knives at 4.8 percent and lastly, Other Firearms at 0.5 percent.

Activity

Once again "Attempting Arrests" was the activity which led to the greatest number of assaults -- 43.8 percent. "Responding to Disturbance Calls" -- 14.9 percent, "Other Activities" -- 9.9 percent, "Handling Mentally Deranged Persons" -- 7.9 percent, "Handling Prisoners" -- 7.1 percent and "Civil Disorders" -- 7.1 percent, were the next highest in frequency.

Assignment

Police officers assigned to two-man vehicles were again the most frequent victims of assault -- 43 percent -- as compared to 13 percent for those assigned to one-man vehicles, 14 percent for detectives or special assignments and 30 percent for all other assignments.

Time

Almost 47 percent of all assaults occurred between the hours of 4:00 PM and midnight -- the hours when police are typically their busiest. The hours of 8:00 AM to 4:00 PM recorded the lowest number of assaults -- 24 percent.

LAW ENFORCEMENT EMPLOYEES

Law enforcement agencies in 1981 reported that a total of 65,549 persons -- uniformed and civilian, full and part-time -- were employed. This figure represents a slight increase of one percent over the number of employees in 1980. The largest department was, of course, the New York City Police Department with 27,831. The next largest departments, in order of size, were the N.Y. State Police with 4,029, Nassau County Police with 3,901, NYC Transit Authority Police with 3,298, and the Suffolk County Police with 3,025.

A total of 84 percent of the employees statewide were uniformed officers of whom 97 percent were employed full time. Slightly more than three percent of the uniformed personnel were females. Sixteen percent of the employees were civilian. This figure represents a small increase of one percent over the 1980 proportion.

A total of 4,359 persons were employed by sheriff departments across New York State in 1981, a decrease of nearly six percent over the previous year. Of all the sheriff personnel, 85 percent were uniformed and 15 percent were civilian. A total of 7,712 persons were employed by special police agencies, such as: authorities (transit, housing, port), parks, railroads, university campuses, etc. This figure represents an eight percent increase over 1980.

LAW ENFORCEMENT EXPENDITURES

During 1981, approximately 93 percent of the State's law enforcement agencies submitted an estimate of their operating expenditures for the year. The combined figures totalled $1,682,583,967 of which $719,271,981 was expended by the New York City Police Department; $509,603,029 by other municipal police agencies; $243,867,714 by the specialized police agencies (authorities, railroads, parks, universities, etc.); $109,277,879 by the New York State Police; and $100,563,364 by county sheriff's departments.

In Memoriam

The Division of Criminal Justice Services joins the criminal justice community in extending its sincere sympathy to the families of the following officers who gave their lives in the performance of protecting and serving the citizens of New York State during 1981:

* * * * * *

ANTHONY ABRUZZO . . . . .New York City Police Department
Slain with a 38 caliber handgun while attempting to thwart a robbery of a relative.

JOHN SCARANGELLA . . . . .New York City Police Department
Slain with two (2) 9-millimeter semiautomatic handguns as he approached a suspicious van he had stopped.

ROBERT WALSH . . . . .New York City Police Department
Slain with a 32 caliber handgun during a robbery attempt of a local tavern.

JAN BRINKERS . . . . .New York City Housing Authority Police Department
Slain with a 38 caliber handgun during a robbery attempt of a local tavern.

WAVERLY BROWN . . . . Nyack Village Police Department
EDWARD O'GRADY . . . . Nyack Village Police Department
Slain by a left-wing extremist group wielding shotguns and automatic handguns as they approached a van they had stopped. The vehicle was suspected as being used in an armored car robbery that resulted in the murder of one of the guards and the wounding of others.

CORRECTION OFFICERS

DONNA PAYANT . . . . .Green Haven Correctional Facility
Slain during the performance of her duties while at the above correctional facility. The circumstances surrounding the death are currently undergoing investigation.

OFFICE OF COURT ADMINISTRATION

COURT OPERATIONS

The Office of Court Administration (OCA) publishes a report annually reflecting the operations of the courts in New York State. We have selected a number of tables presented in that report which complement the data gathered and reported by DCJS.

THE COURT OF APPEALS

The Court of Appeals is the highest court in New York State. In 1981, the Court decided 706 appeals, 529 involving civil matters and 177 criminal cases (Table OCA-I). The basis of jurisdiction in the Court of Appeals in 396 (75%) of the civil appeals disposed of was a reversal, modification or dissent in the Appellate Divisions. Some 97 (18%) of the civil appeals were heard by permission of either the Appellate Divisions or the Court of Appeals.

In the 529 civil appeals disposed of, 369 (70%) judgments or orders were affirmed, 126 (24%) reversed, 25 (5%) modified, and 9 (2%) dismissed. Among the 177 criminal appeals disposed of, 121 (68%) judgments were affirmed, 36 (20%) reversed, 9 (5%) modified and 11 (6%) dismissed.

APPELLATE DIVISIONS OF THE SUPREME COURT

The Appellate Divisions provide the first level of appeal from the superior trial courts, in addition to performing other functions. Of the 9,255 cases disposed, 6,111 (66%) were affirmances, 802 (9%) modifications, 1,479 (16%) were reversals without a new trial, 58 (1%) were orders of new trials, 417 (5%) dismissals and 388 (4%) were other types of dispositions (Table OCA-II).

APPELLATE TERMS OF THE SUPREME COURT

The Appellate Terms of the Supreme Court received 2,248 appeals and disposed of 1,718 in 1981 (Table OCA-III). The First and Second Departments togethered rendered 1,243 decisions, filed 1,141 per curiam opinions and wrote 95 memoranda (not filed). A total of 5,144 motions were heard or submitted.

CRIMINAL PROCEEDINGS

A total of 10,778 felony defendant-indictments were awaiting disposition of their cases in Supreme Court in New York City at the end of 1981. This total represents a 7% increase from the 10,051 pending at the end of 1980. A breakdown of these indictments by county is presented in Table OCA-IV.

The Criminal Court of the City of New York

The Criminal Court of the City of New York has jurisdiction over misdemeanors and lesser criminal offenses. It is also the arraignment court of felonies.

Table OCA-V summarizes the court's activities in arrest cases for 1981. The total number of filings during 1981 was 189,051, up 3% from the 182,968 reported in 1980.

There were 182,109 cases disposed of in 1981, an increase of 2% from the 178,333 dispositions reported in 1980. Table OCA-VI presents a listing of dispositions by number and percent by county for 1980 and 1981.

According to the New York City Department of Corrections, 1,510 defendants were detained while awaiting action in the Criminal Court of the City of New York at the end of 1981 compared to 1,375 at the end of 1980. Table OCA-VII lists the number of detainees at the end of 1980 and 1981 by stage of processing.

PROBATION

The New York State Division of Probation publishes data annually describing the workload of probation agencies in New York State. A sample of the reports have been selected and included in this document.

HIGHLIGHTS OF 1981
BASED ON
ANNUAL REPORTS OF WORKLOAD IN
PROBATION DEPARTMENTS

Family Intake

The number of cases seen at probation intake continued an increase which began in 1977. There was a 2% increase over the intake workload of 1980 (136,539 in 1980 to 139,639 in 1981).

Investigations

Regular investigations (J.D., PINS, Pre-Plea and Pre-Sentence) increased by 6% (from 77,793 in 1980 to 82,804 in 1981). Total investigations increased by 30% (129,366 in 1980 to 133,338 in 1981).

Pre-Disposition Supervision

Pre-Disposition supervision cases received, increased by 11% from 13,966 in 1980 to 15,441 in 1981.

Probation Supervision

The number of probation cases received for supervision increased by 4% (from 43,501 in 1980 to 45,079 in 1981). Of this number, 10,782 were sentenced for felony crimes, an increase of 22% over the 8,831 recorded in 1980. On the last day of 1981, there were 74,681 persons receiving probation supervision; 32,055 of these were in New York City.

There were 9,686 probation violations filed on criminal cases in 1981, an increase of 9% over the 8,865 filed in 1980.

CORRECTIONAL SERVICES

The New York State Department of Correctional Services has made available for inclusion in the 1981 Annual Crime and Justice Report data concerning admissions to department custody, inmates under custody, and releases from department custody. These data complement other data contained in this report and should provide a better understanding of the criminal justice process.

Under Custody Population (Exhibit 1 and 2)

The number of inmates under custody declined from 12,525 at the end of calendar year 1971 to a low of 12,444 at the close of 1972. This decline began in 1964 and continued over a nine-year period. Contributing to this decline was the Baxtrom decision which led to the release from Department custody of all criminally insane inmates held beyond their maximum expiration dates along with related decisions which ended the practice of holding under custody dangerously mentally incapacitated persons for long periods of time. These decisions, coupled with other factors including a revised Penal Law which became effective in September of 1967, changes in sentencing procedures, and the development of major institutional programs for drug addicts by the state's drug control agency, resulted in an annual net loss in the under custody population which continued through 1971. This situation was reversed in 1973 when admissions exceeded releases for the first time since 1963. This rise in the under custody population has continued through 1981, when the under custody population rose to 25,599 (exclusive of 415 detained parolees), an increase of 105.7 percent over a nine-year period.

Admissions to Department Custody (Exhibit 3)

Admissions registered a steady rise from an annual total of 7,242 in 1971 to 10,272 in 1977. The number of admissions fell to 8,836 in 1978 but resumed an upward trend in 1979 reaching an all time high of 12,481 in 1981. The high number of 1976 and 1977 admissions reflected efforts by the Office of Court Administration to reduce a large backlog of felony cases pending before the Supreme Court which resulted in a temporary acceleration of the already high and rising rate of court commitments. A similar effort in 1981 contributed to an all time high of 10,303 court commitments. Court commitments account for eight of ten admissions and trends in this category largely shape the flow of offenders into State prisons. Court commitments declined to 4,250 in 1970. From this 1970 low, commitments have risen to a high of 10,303 in 1981, an increase of 142.4 percent. Beginning in 1971, felony commitments rose rapidly, offsetting declines in other types of commitments. Contributing to this trend has been a rise in felony arrests, indictments and court dispositions and an increasing tendency of the courts to commit convicted felons to state correctional facilities. Several more stringent laws enacted in 1973 and subsequent years have added to this increase in commitments. These include the Second Felony Offender Law, which has imposed mandatory indeterminate sentences on such offenders; a drug law which has imposed harsher penalties on drug offenders; and the law imposing mandatory indeterminate terms for all Class B felonies and for certain Class C and D felonies. The trend toward increased court commitments has continued through 1981 reflecting the impact of the violent felony offender legislation which became effective in September 1978.

Releases from Department Custody (Exhibit 3)

Releases from DOCS custody remained relatively stable during the five-year period, 1971-1975, averaging 7,285 annually. In 1976 a sharp rise in releases is observed, up 10% over the previous year. This substantial rise reflected a growth in the pool of parole eligible inmates in the burgeoning inmate population who were subsequently released to parole supervision. 1978 saw a temporary drop in releases which reflected longer minimum periods of incarceration being set by the Board of Parole and a modest shift toward longer sentences on the part of the courts, both of which lessened the number of paroles. Releases for 1979 and 1980 resumed an upward trend, including all time high volumes of parole and conditional releases. A decline in 1981 releases reflects both sentencing changes under the Violent Felony Offender Law as well as change in the manner in which the minimum period of incarceration was determined for a considerable portion of the inmate population. It is expected that releases will resume an upward trend in 1982 and subsequent years.

Reason for Commitment (Exhibit 4)

Of the 1981 commitments, 97 percent were sentenced as felony offenders. The remaining three percent were sentenced as Youthful Offenders. Slightly over one-third (37%) were sentenced as second or persistent felony offenders.

The largest portion (64%) of the 1981 commitments had been convicted of Violent Felony Offenses. Of these VFO commitments, 31% had been sentenced as second felony offenders. Commitments for robbery led the VFO group followed by crimes of homicide, dangerous weapons, burglary, assault and sex crimes.

Among commitments for other felonies, 48% were sentenced as second felony offenders. Of the 3,762 other felonies there were 436 commitments for offenses involving violence or coercion. The largest single category in this group was robbery 3rd which accounted for 62% or 271 commitments. The majority of robbery 3rd cases, 56% or 152 were second felony commitments. The largest portion of the other felonies group consisted of property or drug type crimes, a total of 3,326. Drug felonies was the largest category in this group with 1,019 commitments (10% of total commitments). The proportion of second felony offenders among property offenders (burglary 3rd, grand larceny, forgery, and other) was 58% while 27% of the drug offenders were committed as second felony offenders.

NEW YORK STATE COMMISSION OF CORRECTION

Mission of Commission

The State Commission of Correction (SCOC) has oversight responsibility for all correctional facilities within New York State. The Commission makes recommendations to the Governor, and through the Governor to the Legislature, concerning strategies for improving corrections. The Commission identifies issues that affect corrections and problems that have systemic implications and pose a threat to the safety and well-being of prisoners and staff. Included in the Commission's responsibility is the promulgation of minimum standards to serve as guidelines for correctional management, the development of policy level decisions to encourage compliance of those rules and regulations, and the offering of technical assistance.

The Commission has adopted three goals toward which its policy development and evaluative activities are directed:

1) To ensure the humane treatment of all persons confined within correctional facilities;

2) To improve the operations and programs of each correctional facility and the overall correctional system;

3) To improve the functioning of the SCOC in the carrying out of its mandate.

The Commission of Correction is legislatively mandated to investigate, review, amend and enforce standards for safe, sanitary and orderly settings in all correctional facilities in the State of New York (State, Counties, Villages, Towns, New York City and Other Cities), for both staff and inmates. To assist in this effort, the Commission offers technical assistance to facilities and agency administrators through the provision of basic and in-service training for correctional personnel. The Commission approves, and when appropriate, assists in the development of proposed new construction and serves as a central repository for information on the correctional system in New York.

Inmate Population Increase in 1981

In April of 1980, the Commission began to record the inmate population in correctional facilities operated by the counties, the State Department of Correctional Services, and the New York City Department of Corrections. At the time of this first survey, the total incarcerated population was 33,433. Of this number, 5,403 were in county facilities, 7,060 were in New York City facilities and 20,970 were in state facilities.

Staff of the Program and Policy Analysis Unit undertook a similar census in November. At that time the population had swelled to 36,361 with the greatest rate of growth, 19.9%, in the New York City facilities. The counties showed a 13.7% increase and the state had a 3.7% increase.

The following table depicts the Local, State, and New York City Correctional Facilities and population and change from April, 1980 to November, 1980.

TABLE I

1980 Population Changes in Correctional Facilities
(April to November 1980)

Correctional Facilities	Population Counts 4/80	Population Counts 11/80	Increases # of Prisoners	Increases % Change
Local Correctional Facilities	5,403	6,146	743	+ 13.8%
New York City Correctional Facilities	7,060	8,467	1,407	+ 19.9%
State Correctional Facilities	20,970	21,748	778	+ 3.7%
TOTALS	33,433	36,361	2,928	Avg. =+ 8.8%

During 1981, the population at nearly all correctional facilities continued to expand. The state and New York City increased the general housing areas through renovation, new construction, and use of temporary facilities. The state Department of Correctional Services reported an increase in general housing of over 3,000 and New York City reported space for an additional 2,000 inmates. County correctional facilities showed only a marginal increase in their capacities.

In November of 1981, each county was again contacted by the staff of Program and Policy Analysis. Information about the inmate population was requested. This information, together with materials from the state and New York City facilities, show that there were over 5,000 more persons incarcerated in November of 1981 than in November of 1980. The largest contributing factor was the increase in the state facilities.

The following table depicts the Local, State, and New York City Correctional Facilities, their current maximum prisoner capacity (general housing space), population counts, and change for November 1980 and November 1981.

TABLE II

1981 Population Changes in Correctional Facilities

Correctional Facilities	Maximum Prisoner Capacity	Population Counts 11/80	11/81	Increases # of Prisoners	% Change
Local Correctional Facilities	6,546	6,146	6,430	284	+ 4.6%
New York City Correctional Facilities	9,684	8,467	9,577	1,110	+ 13.1%
State Correctional Facilities	22,822	21,748	25,357	3,609	+ 16.6%
TOTALS	39,052	36,361	41,364	5,003	Avg. =+13.8%

Local Correctional Facilities experienced an increase in their daily population of prisoners from 6,146 in November 1980 to 6,430 in November 1981. These 284 inmates represent a 4.6% increase over the year.

New York City Correctional Facilities show an increase in their daily prisoner population of 1,110 from November 1980 to November 1981, an 13.1% increase over the year.

State Correctional Facilities experienced an increase in their daily prisoner population of 3,609, up 16.6% from November 1980 to November 1981.

While the 13.7% overall increase in a twelve-month period is cause for concern, even more alarming is the fact that the population, currently at over 41,000 is nearly 8,000 more than the population identified in the first census in April of 1980.

The Commission will redouble its efforts to assist all agencies concerned with the issues of overcrowding. As the populations in these correctional facilities continue to escalate, the pressures brought to bear on the correctional staffs, inmates and the criminal justice system will only exacerbate an already dangerous situation.

Jail Population Profile

An integral component of the November 1981 survey of local correctional facilities was identifying the inmate population by classification. According to Correction Law, 500-c, each facility must house its population in one of twelve classifications. These are: awaiting Trial and Examination, Sentenced and Civil Process; with each category having subdivisions of male and female, as well as minor and adult. For all local correctional facilities in the state (excluding NYC) there were 6,546 spaces available in these classifications. Areas referred to as Special Housing Units for punitive or administrative segregation are not included in this figure.

On November 17, 1981, there were 6,421 inmates housed in local correctional facilities. Of these, 4,675 were adults and 1,746 were minors between the ages of 16 and 21.

TABLE III

Population at Local Correctional Facilities (excluding NYC)

November 17, 1981

	Adults		Minors		Total
	M	F	M	F	
Six Largest Counties	2,634	219	749	61	3,663
Remaining Counties	1,707	115	895	41	2,758
TOTAL	4,341	334	1,644	102	6,421

Fifty-seven percent (57%) of the inmates in local correctional facilities were housed in the counties of Erie, Monroe, Nassau, Onondaga, Suffolk and Westchester. The remaining 49 counties (Fulton and Putnam County Jails are closed) account for the remaining 43% of inmates in local correctional facilities excluding New York City.

There were 3,599 persons in county jails awaiting trial or examination. This is in contrast to the 2,822 inmates who were serving sentences in these same institutions.

TABLE IV

UNSENTENCED INMATES BY SEX AND AGE IN LOCAL CORRECTIONAL FACILITIES (EXCLUDING NYC) ON NOVEMBER 17, 1981

	Adults		Minors		Total
	M	F	M	F	
Six Largest Counties	1,528	114	391	32	2,065
Remaining Counties	988	54	464	28	1,534
TOTAL	2,516	168	855	60	3,599

Minors accounted for 25% of the unsentenced inmates. Women made up 6% of the unsentenced population. Adult males were 70% of the unsentenced population.

Sentenced inmates represented 44% of the incarcerated population. These 2,822 inmates consisted primarily of adult males (65%), and minor males (28%).

TABLE V

SENTENCED INMATES BY SEX AND AGE IN LOCAL CORRECTIONAL FACILITIES (EXCLUDING NYC) ON NOVEMBER 17, 1981

	Adults		Minors		Total
	M	F	M	F	
Six Largest Counties	1,106	105	358	20	1,589
Remaining Counties	719	61	431	22	1,233
TOTAL	1,825	166	789	42	2,822

As with the unsentenced population, women represented a very small fraction of sentenced inmates, just over 7%.

In summary, slightly more than half of all inmates incarcerated in local correctional facilities on a randomly selected date, November 17, 1981 were unsentenced. Sixty-eight percent of all inmates were adult males and another 26% were minor males under the age of 21.

In 1982 the Commission will intensify its efforts to develop more data on inmate profiles and incarceration patterns.

DIVISION FOR YOUTH

During 1981 2,435 individuals were admitted to residential facilities operated by the New York State Division for Youth. Of these, 1,941 were first admissions having had no prior contact with Division programs; 332 were readmissions from aftercare; and 162 had experienced previous placements with the Division. (TABLE VI)

For those youths adjudicated Juvenile Delinquents, Restrictive Juvenile Delinquents or Juvenile Offenders, the offenses of burglary, robbery, larceny and other thefts accounted for 76.4% of the admissions. Assaults and homicides were responsible for an additional 9.4% of the admissions for this group (Table I).

Among the 2,435 admissions, 11.0% were placed in secure facilities and an additional 14.4% in limited secure facilities. The largest category among admissions was cooperative/voluntary which accounted for 20.2% of the admissions (Table II).

Juvenile Delinquent adjudications accounted for 53.6% of the admissions and Juvenile Offender adjudications an additional 7.8%. Persons In Need of Supervision were responsible for 16.2% of the 1981 admissions (Table III).

Males made up 78.7% of the admissions and females the remaining 21.3% (Table IV). Table V which lists admissions by ethnicity, shows whites accounting for 46.4% of the admissions, closely followed by blacks at 42.2%.

DIVISION OF PAROLE

Parole Board Activity

During the year, the Parole Board conducted almost 15,500 interviews in state and local prison facilities to determine parole eligibility for certain inmates, release of inmates to parole and re-release of parole violators and other administrative interviews. Table 1 displays the different types of interviews conducted by the Board of Parole.

Of particular note in Table 1 are the MPI* and prison release interviews. The number of MPI Interviews (1,822) held during the year represented a 41% decline from that of the previous year. This trend reflects the increasing number of offenders entering prison with a court-set minimum as a result of a change in the Penal Law in 1980. The new law required the Court to fix a minimum period of inprisonment in all cases where an individual is sentenced to an indeterminate sentence in a State Correctional Facility.

Inmates who have served their judicially imposed minimum sentence or Board-set minimum become eligible for an initial parole release interview. During 1980-81, these inmates numbered 7,770. Parole release was granted by the Board to less than half (45%) of these individuals. This rate represented a 7% decline from the previous year.

Reappearance interviews are held for those inmates who have been denied parole and reappear before the Board for a release decision. During the 1980-81 period, 2,439 inmates saw the Board for a reappearance interview. The Board granted release to 1,383 of those inmates (a 57% reappearance interview release rate).

During 1980-81, the overall paroling rate from state correctional facilities was 50%, a decrease of 4% from that of the previous fiscal year. (Note: This percentage also includes a small number of re-released parole violators.)

Institution Parole Services

The workload of parole officer staff within correctional facilities is determined by the number of incoming inmates, preparing them for parole release and assisting the Parole Board in conducting interviews. During the year, the parole officers in state and local facilities conducted 39,883 inmate interviews related to Parole Board interviews and held 1,541 classes to acquaint parole eligible inmates with Board interview procedures. Table 2 displays some of the major activities of the institutional parole staff.

During the latter part of 1979-80 and continuing throughout 1980-81, the Division shifted the focus of institutional parole activities. A greater emphasis was placed on counseling inmates with problems that could affect their success while on parole in the community. The institutional parole officers now assume more of an advocacy role by identifying and obtaining needed counseling services

*Minimum Period of Imprisonment

for inmates. Also, the staff attempts to involve inmates more in the Pre-Release Center programs. Pre-Release programs are mainly run by inmates who provide peer counseling in a variety of areas; e.g. preparing for employment or changes that an inmate may be confronted with upon return to his/her community or family. There are Pre-Release Centers within 15 of the 33 state correctional facilities.

The decision to shift the focus of institutional parole staff was based upon an agency goal to improve inmate transition to the community. Another basis for this decision was the result of a staff-time allocation study conducted by Audit and Control. The study showed that the new programmatic thrust could be implemented without affecting Parole Board related activities, particularly in view of the declining number of MPI interviews and related case preparations.

Finally, the institutional parole officers continued to participate on the correctional temporary release committees in deciding which inmates are granted temporary work release, furlough and other leaves of absence for good cause.

Community Supervision of Parolees

During all or part of the year, there were 23,940 individuals under community parole supervision. Approximately 91% of these parolees were being supervised within New York State. The remainder were being supervised out of state, pursuant to the Parole Inter-State Compact with sister states. As of March 31, 1981 there were 17,223 parolees under community supervision within the state (see Tables 3 and 4).

Parolee Profile

Seventy percent (70%) of the individuals under community parole supervision during the year were residents of New York City. The other 30% were from suburband NYC counties and upstate areas.

Ninety-six percent (96%) of the parolees were males. Slightly less than half (48%) were Black, 28% White, 17% Hispanic, and 7% other ethnic groups. The median age of all parolees was 31 years.

The parolees were originally convicted and sentenced to prison for a variety of crimes. The five most frequently committed offenses were: robbery (33%), drug selling (13%), murder/manslaughter (12%), burglary (10%), and assault (4%). The remaining 28% were convicted for offenses which include arson, drug possession, rape/sodomy, weapon possession, theft/possession of stolen property, and those adjudicated as youthful offenders.

The median time served in state prison by parolees prior to parole was 30 months; but, there was a significant amount of variation around this average, depending on individual offense convictions. Further, the 30 month median excludes time offenders spent in a local jail prior to being transferred to a state facility.

Outcome of Parole Supervision

Less than 10% of all parolees under supervision during the year were returned to prison by the courts for committing new crimes or by the Parole Board for violating the rules of parole (e.g., absconding, illegal use of drugs, etc.).

The overall prison-return rate for the current year represented a slight increase of 0.3% over that of the previous year. The increases for parolees returned for new crimes and for those returned for violating conditions of parole were 0.1% and 0.2%, respectively (see Table 5).

In view of the data on parolees returned to prison in 1980-81, the parole supervision success rate can be measured in several different ways.

- First, in terms of the total number of parolees not returned to prison, the success rate of parole supervision during the year was 90.3%. This result is an indication of the Division's overall performance in deterring parolee crime and reincarceration.

- Second, from the point of view of enforcing the rules of parole, parolees returned to prison for rule violations cannot really be considered "failures" in the same sense as those who were returned for new criminal convictions. Absconding from supervision or use of illegal drugs, for example, is less serious than committing a violent offense. Furthermore, a prison return based on a rule violation decreases the chances of a parolee being a threat to community safety. Given this, the supervision success rate was 97.0% (i.e., only counting as real criminal recidivists the 721 parolees reincarcerated for new crimes during the year).

- Finally, using a much "softer" measure of the number of deterred parolee delinquents, the supervision success rate for the year was estimated at 75%. This estimate is based on the number of parolees who were neither returned to prison during the year for any reason nor in any form of delinquent status at the end of the year. Those in delinquent status are either unapprehended absconders from supervision, or involved in the parole hearing process (to decide on whether a parolee's behavior warrants revocation of parole).

Revocation decisions are made by the Parole Board on a case by case basis, taking into account the seriousness of the alleged delinquent parole behavior, evidence for the behavior and whether reincarceration of a parolee would benefit society. The reader is, therefore, cautioned that not all parolees in delinquent status at the end of the year will subsequently have their parole revoked. To this extent, this third measure of supervision success or nondelinquents by the end of the year is tentative or "soft" at best.

Based on an average of the three preceding specific rates, the comprehensive success rate for parole supervision for the year was 87.4%. This was comparable to the 87.6% overall success rate for the 1979-80 period.

Table 1

Type of Interviews Conducted by Parole Board Between April 1, 1980 and March 31, 1981

Type of Interview	Number 1980-81	1979-80	Percent Change
Minimum Period of Imprisonment (MPI)	1,822	3,086	- 41%
Release of State Prison Inmates (Initial and Reappearance Interviews)	10,209	9,393	+ 9%
Release of Local Inmates	2,097	2,700	- 22%
Parole/Conditional Release Revocations*	273	415	- 34%
Re-Release of Parolees Returned to Prison for Violations	828	869	- 5%
Administrative Interviews**	142	357	- 60%
TOTAL Interviews	15,371	16,820	- 9%

* A Conditional Release is an inmate released from prison by statute, not by the Parole Board. Such an individual is released to parole after having served two-thirds of his/her maximum sentence in prison. Revocation hearings for inmates released by the Board are conducted by specialized Hearing Officers, who were involved in approximately 8,000 preliminary and final revocation hearings during 1980-81.

** Administrative interviews include other interviews that do not fall into the categories above.

Table 2

Institutional Parole Activity Between April 1, 1980 and March 31, 1981

Activity	Number 1980-81	Number 1979-80	Percent Change
Parole Orientation Classes for Inmates	1,541*	833*	+ 85%
Inmate Interviews for Parole Board Activity	39,883	34,391	+ 16%
Pre-Release Inmate Interviews-Counseling	11,272	11,071	+ 2%
Inmate Group Counseling Sessions	179**	132**	+ 36%

* Involved an average of 30 inmates per class (1980-81); 27 per class (1979-80).

** Involved an average of 10 inmates in three facilities (1980-81); 8 inmates (1979-80).

Table 3

In-State Distribution by Area Office
As of March 31, 1981

Parole Area Office	Number of Persons Under Parole Supervision	Percent
Manhattan I	1,046	6%
Manhattan II	831	5%
Manhattan III	766	4%
Brooklyn I	929	5%
Brooklyn II	946	6%

Poughkeepsie	620	4%
Hempstead	1,054	6%
Grand Total	17,223	100%

Table 4

Parolee Movement and Census for Years 1980-81 and 1979-80

Movement/Census	1980-81	1979-80	Percent Change 1979-80 To 1980-81
April 1 Active Parolees	14,936	14,003	+ 7%
State Inmates Released by Board	5,440	5,638	- 4%
by CR	2,634	2,400	+ 10%
Local Inmates Released by Board	525	891	- 41%
Cooperative Parolee Agreement from Other States	405	393	+ 3%
Total Inmates Released to /1 Parole Supervision	9,004	9,322	- 3%
Total Caseload Removals /2 (Discharges and Returns)	8,259	8,389	- 2%
Dynamic Population for Year /3	23,940	23,325	+ 3%
March 31 Active Parolees	15,365	14,936	+ 3%
Delinquent Parolees /4	3,578	3,666	- 2%
Total End of Year Caseload (3/31)	18,943	18,602	+ 2%

/1 This includes cases released both within state and out of state.

/2 Removals include parolees discharged from parole supervision by expiration of maximum sentence, death, Board action, court order and prison returns.

/3 Dynamic Population is the cumulative number of parolees under supervision during all or any part of the year.

/4 Delinquents are those parolees carried by parole officers who are either in the stages of the violation process or are absconders. Not all delinquents in the violation process will have their parole revoked.

Table 5

Parolee Prison Return Rates

Outcome Measure	1980-81 /1	1979-80 /2
Rate of Parolees Returned to Prison With New Court Conviction During Year	3.0% (n=721)	2.9% (n=678)
Rate of Parolees Returned to Prison For Violating Conditions of Parole During Year	6.7% (n=1,604)	6.5% (n=1,510)
Total Rate of Prison-Returns During Year	9.7% (n=2,325)	9.4% (n=2,188)

/1 Rates computed on basis of dynamic population of 23,940 parolees during April 1, 1980 to March 31, 1981.

/2 Rates computed on basis of dynamic population of 23,325 parolees during April 1, 1979 to March 31, 1980.

CRIME VICTIMS BOARD

Claims Analysis

The Crime Victims Board (CVB), established on August 1, 1966, compensates eligible violent crime victims who have: suffered a serious financial hardship, been physically injured, reported the crime promptly to the police, and been adjudged as being an innocent victim. It is estimated that 15% of reported violent crimes involve losses potentially covered by the CVB. To date, 5.2% of all violent crime victims participate in the program administered by the CVB.

The CVB is designated as the "payer of last resort". Compensation that the CVB is able to provide includes awards for: unlimited unreimbursed medical expenses; unreimbursed loss of earnings up to a maximum of $250.00 per week; unreimbursed loss of support up to an aggregate amount of $20,000; and lastly, unreimbursed funeral expenses up to a maximum of $1,500. Many financial losses incurred by crime victims involve the repair or replacement of essential personal property damaged or stolen during the course of the crime. These losses, at present, are not able to be covered by the CVB, although current legislation has been introduced for just such purposes.

For fiscal year 1981-82, the CVB received 8,774 claims and expended $6,357,822 exclusively for crime victims. This expenditure represents an 11% increase over the previous fiscal year, due in part to the decrease in collateral benefits available to crime victims.

All New York State law enforcement agencies and officials who have direct contact with crime victims, have claims forms and information brochures on hand to give out relating to the availability of compensation from the CVB. As public awareness of the CVB is heightened, it is anticipated that there will be similar increases in claimants during the next fiscal year.

Under innovative legislation signed by Governor Carey (Chapter 415, Laws of 1979, effective October 1, 1979), the Board's statutory mandate was extended to "actively speak for the rights and interests of crime victims" in the criminal justice system. This legislation added ten new powers and duties to the Board's existing statute. The Board was charged with coordinating the planning programs serving victims of crime on a statewide basis, advocating the rights and interests of crime victims before other units of government, conducting research on the problems affecting crime victims, and advising the Governor and the Legislature on laws and procedures affecting crime victims in New York State.

Effective April 1, 1979, the Board commenced operations of a Senior Citizens Unit. This unit is responsible for handling all claims filed by victims or their dependents who are 60 years or older and to follow up on these cases, including contact with victims or relatives, hospitals, doctors, employers, etc. The unit rendered special assistance to the elderly by assisting them in the preparation of required documentation for processing claims. The unit has significantly reduced the amount of claims that were disallowed for lack of documentation and has demonstrated that the elderly require this special assistance.

Since the inception of the Senior Citizens Unit, two additional investigators have been added to provide for better service for elderly crime victims who have filed claims with the CVB.

WORKLOAD SUMMARIES

Fiscal Year	Claims Received	Payment to Victims	Awards
1967	196	55,665	43
